MEMO

DATE: September 25, 2003

TO: All Interested Parties

FROM: Southern California Association of Governments

SUBJECT: Draft 2004 RTP Alternatives' Growth Forecasts - Release for Public Review and Comment
For Additional Information go to http://scagrtp.migcom.com/

The Draft 2004 Regional Transportation Plan (RTP), Direction 2030, includes a Regional Plan Growth Forecast for population, households and employment. The 2004 RTP growth forecast updates the 2001 RTP growth forecast for the region from 2000 to 2030. A major difference between the 2001 growth forecast (adopted in April 2001) and the 2004 growth forecast is a change in the forecast horizon from 1997-2025 to 2000-2030.

The 2004 RTP growth forecast relies on a variety of inputs to accurately reflect the long-term demographic and economic picture of the SCAG region, including recently available information from international, federal, state statistical agencies, and subregion/local jurisdictions.

The attached tables include the population, household and employment forecasts for the years 2000, 2010 and 2030 for the SCAG region, its 6 counties, 14 subregions, and 188 cities for the following three Draft 2004 Plan Alternatives and a Local Input data set:

1. 2004 RTP Preferred Plan Alternative*
2. 2004 RTP Preferred Plan Alternative without Operation Jumpstart
3. 2004 RTP No Project Alternative
4. Local Input Data Set

2004 RTP Preferred Plan Alternative* - The recommended draft Plan Alternative or "Growth Vision" Alternative is a policy choice based on transportation/ land use strategies that maximize the existing and planned transportation system infrastructure. These investments and policies, which redistribute growth as compared to the No Project Alternative, outperform all other alternatives analyzed. This Alternative follows Local Input through 2010 and assumes a level of local land use policy change only after this time. This Alternative includes an economic development component consistent with the strategies in Operation Jumpstart.

2004 RTP Preferred Plan Alternative without Operation Jumpstart – This Alternative is consistent with 2004 RTP Preferred Plan Alternative, however, it does not include the Operation Jumpstart regional economic stimulus program, thus reducing the regional jobs and households in 2030 by 368,000 and 184,000, respectively.

2004 RTP No Project Alternative – This Alternative is a technical estimate absent the regional policies and investments included in the 2004 RTP. This assumes no investment above the current baseline investments, or approximately $48 billion less in regional investments compared to the Plan Alternatives.

Local Input Data Set – This is not a 2004 RTP Alternative, rather a data set included for comparison. It was used extensively in developing the 2004 RTP Preferred Plan Alternative. This data set reflects the input SCAG received from local jurisdictions between September 15th to December 1, 2002 in anticipation of developing the 2004 Plan Forecast. Ninety percent of jurisdictions in the region provided their input to SCAG during this review period.

---

* This forecast includes 368,000 jobs and 184,000 households expected to be created by the Operation Jumpstart regional economic stimulus program. Operation Jumpstart has not been approved by the Regional Council.

All of the information provided in the attached tables is public information, in draft form, subject to a public hearing prior to its approval in April 2004.

Anyone publishing or disseminating any of the information provided in the attached tables should use one of the following sample citations:
