This project is located in the City of Pasadena on these three corridors: Colorado Bl, Lincoln Bl and Orange Grove Bl. The number of intersections scheduled for upgrades and enhancements is 28. This project will implement the following improvements to all above-mentioned corridors and corresponding intersections: new 332-type traffic-signal cabinets, advanced Type 2070 traffic-signal controllers, implementation of new vehicular video-detection systems and advanced communication systems to allow for connectivity to the City's Transportation Management Center. Connectivity will be accomplished via fiber optic and all communication devices necessary to integrate the traffic signal controllers into the City's fiber-optic network will be designed for at each intersection.																	x
