FINAL Overall Work Program

FISCAL YEAR 2018-2019

SECTION I Regional Prospectus

Southern California Association of Governments

The Southern California Association of Governments (SCAG), founded in 1965, is a Joint Powers Authority under California state law, established as an association of local governments and agencies that voluntarily convene as a forum to address regional issues. Under federal law, SCAG is designated as a Metropolitan Planning Organization (MPO) and under state law serves as the Multicounty Designated Transportation Planning Agency for the six (6) county Southern California region. Through SCAG, city and county governments throughout Southern California come together to develop solutions to common problems in transportation, housing, air quality, and other issues.

Under the guidance of the Regional Council and in collaboration with its partners, SCAG's mission is to foster innovative regional solutions that improve the lives of Southern Californians through inclusive collaboration, visionary planning, regional advocacy, information sharing and promoting best practices.

SCAG's primary responsibilities include the development of the Regional Transportation Plan and Sustainable Communities Strategy (RTP/SCS); the Federal Transportation Improvement Program (FTIP); the annual Overall Work Program (OWP); and transportation-related portions of local air quality management plans. Under the federal Clean Air Act, SCAG is responsible for determining if regional transportation plans and programs are in conformity with the purpose of applicable federal regulations and state air quality plans. SCAG's additional functions include intergovernmental review of regionally significant development projects, and periodic preparation of a Regional Housing Needs Assessment (RHNA).

In addition to the six (6) counties and 191 cities that make up SCAG's region, there are six (6) County Transportation Commissions (CTCs) that hold the primary responsibility for programming and implementing transportation projects, programs and services in their respective counties. The agency also operates via a number of critical partnerships at the local, state and federal levels. In addition to its federal and state funding partners (Federal Highway Administration, Federal Transit Administration, Federal Aviation Administration, California Transportation Commission, California Department of Transportation, etc.), SCAG's planning efforts are closely coordinated with regional transit operators, Tribal Governments and fifteen sub-regional Councils of Governments (COGs or Subregions) or joint power agencies that represent SCAG's cities and counties.

Introduction

This Overall Work Program (OWP) identifies all the planning projects to be accomplished by SCAG during the fiscal year of July 1, 2018 through June 30, 2019 (FY 2018-19). These planning efforts are funded with federal, state and local resources. The OWP discusses the planning priorities, the needs of the region, and the specific programs to meet those needs. It serves as a management tool for SCAG's main governing body, the Regional Council, as well as its policy committees, working groups and staff. It additionally provides local and state agencies a focal point for improving regional

coordination and reducing duplication of work efforts at all levels. The work contained in this OWP complies with federal and state requirements, including requirements under Fixing America's Surface Transportation Act (FAST Act) and Moving Ahead for Progress in the 21st Century (MAP-21), and it reflects a concentrated focus on the development of the 2020 RTP/SCS which includes efforts related to congestion reduction, financial planning, system preservation and performance measures – areas identified as important by SCAG and the U.S. Department of Transportation (U.S. DOT).

The Regional Prospectus is structured as follows:

١.	SIGNIFICANT REGIONAL CHARACTERISTICS AND ISSUES	Page 2
II.	REGIONAL TRANSPORTATION NEEDS, PLANNING PRIORITIES AND GOALS	3
III.	HOW NEEDS, PRIORITIES AND GOALS ARE ADDRESSED IN THE WORK ELEMENTS	5
IV.	IMPLEMENTATION OF THE RTP/SCS AND FTIP	23
V.	OVERVIEW OF PUBLIC PARTICIPATION AND CONSULTATION	23
VI.	SCAG'S ORGANIZATIONAL STRUCTURE AND DECISION-MAKING STEPS	25
VII.	MAP-21 IMPLEMENTATION: TRANSITION TO PERFORMANCE-BASED PLANNING AND PROGRAMMING	28

I. Significant Regional Characteristics and Issues

Southern California has experienced some of the worst congestion in the country for the past two decades. The region also suffers from the lack of affordable housing. With the population expected to grow by nearly 4 million people by the year 2040, mobility is expected to decline as demands placed on existing infrastructure increase. In order to provide for the mobility needs of the future while improving the region's sustainability and economy, regional solutions and an unprecedented level of regional cooperation will be essential.

Southern California is also a national gateway for trade, with over 40% of all international containerized goods entering our regional seaports. More than 70% of these goods are destined for other parts of the country. The movement of goods through the Southern California seaports and land ports provides a substantial economic base to the region. Job growth in this industry could replace lost manufacturing jobs as a source of upward social mobility for the nearly 70% of the region's adults without a college degree.

While substantial growth in trade is anticipated – including a more than doubling of containerized imports through the San Pedro Bay Ports – the region will be unable to reap the associated economic benefits without sufficient investment in freight infrastructure (i.e., rail, highway, intermodal, airport, and marine facilities). Moreover, significant challenges arising from the growth in trade will require

appropriate mitigation of already substantial environmental, public health, and community impacts. Addressing these needs will require new, more flexible financial instruments that combine the best features of public and private sector management, as well as new institutional structures to administer them.

Without an infusion of sufficient funding, the region will not be able to demonstrate attainment of health-based national air quality standards and public health and economic growth in the region will suffer as a result.

II. Regional Transportation Needs, Planning Priorities and Goals

A. California Planning Emphasis Areas

FHWA develops California Planning Emphasis Areas (PEAs) each year to promote priority areas for consideration in transportation planning and integration into the OWP specifically. The FHWA California Division and FTA Region IX have determined that the PEAs for California's transportation planning and air quality program for FY 2018-19 are:

- Core Planning Functions
- Performance Management
- State of Good Repair

The following chart shows how SCAG's FY 2018-19 Overall Work Program responds to the State Planning Emphasis Areas:

								FY 2	018-1	19 O	WP A	CTIV	/ITIES	;						
	0 System Planning	D Transportation Finance	00 Environmental Planning	20 Air Quality & Conformity	6 Federal Transportation Improvement Program	유 Geographic Information Systems (GIS)	60 Active Transportation Planning	G Regional Forecasting & Policy Analysis	000 Corridor Planning	6 Sustainability Program	Modeling	8 Performance Assessment & Monitoring	90 Public Information & Communications	60 Regional Outreach & Public Participation	5 Intelligent Transportation System (ITS)	DWP Development & Administration	130	Transit and Rail Planning	5 Collaborative Projects	8 Regional Aviation & Airport Ground Access
California Planning Emphasis Areas																				
1 Core Planning Functions	Х	Х	Х	Х	Х	Х	Х	Х	Х	Х	Х	Х	Х	Х	Х		Х	Х	Х	х
2 Performance Management	Х	Х	Х	Х	Х	Х					Х	Х				Х	Х			
3 State of Good Repair	Х	Х			Х						Х	Х					Х	Х		

B. Federal Planning Factors

Like the PEAs, the federal planning factors in MAP-21/FAST Act Section 134(h) are incorporated in the OWP. Federal planning factors are issued by Congress and emphasize planning factors from a national perspective. The federal planning factors are revised or reinstated with new reauthorization. The ten planning factors are:

- 1. Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency.
- 2. Increase the safety of the transportation system for motorized and non-motorized users.
- 3. Increase the security of the transportation system for motorized and non-motorized users.
- 4. Increase the accessibility and mobility of people and for freight.
- 5. Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns.
- 6. Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight.
- 7. Promote efficient system management and operation.
- 8. Emphasize the preservation of the existing transportation system.
- 9. Improve the resiliency and reliability of the transportation system and reduce or mitigate storm water and reduce or mitigate storm water impacts of surface transportation.
- 10. Enhance travel and tourism.

To address the key issues facing the region and ensure that planning efforts are aligned with the planning emphasis areas identified by the U.S. Department of Transportation, as well as the California Department of Transportation's (Caltrans) strategic plan, the following are SCAG's strategic goals for this OWP from which each work element was developed:

SCAG Goals:

- Align investments and policies with improving regional economic development and competitiveness
- Maximize mobility and accessibility for all people and goods in the region
- Ensure travel safety and reliability for all people and goods in the region
- Preserve and ensure a sustainable regional transportation system
- Maximize the productivity of the regional transportation system

- Protect the environment and the health of our residents by improving air quality and encouraging active transportation
- Actively encourage and create incentives for energy efficiency, where possible
- Encourage land use and growth patterns that facilitate transit and non-motorized transportation
- Maximize the security of the regional transportation system through improved system monitoring, rapid recovery planning, and coordination with other security agencies

III. How Needs, Priorities and Goals are Addressed in the Work Elements

A. Goods Movement

SCAG's goods movement program integrates freight transportation strategies and policies into regional transportation planning. SCAG continues to work with diverse transportation stakeholders to build support for a comprehensive program of investment in freight infrastructure and associated emissions reductions as reflected in the 2016-2040 RTP/SCS.

Recent research initiatives have included:

- Evaluation and analysis of the regional goods movement system (including a comprehensive assessment of potential east-west freight -corridor alignments)
- Recommendations for potential application of new technologies
- Analyses leading to the development of strategies for mitigating environmental impacts of major regional goods movement projects

In FY 2017-18, SCAG continued efforts to refine and support the implementation of strategies developed through the Comprehensive Regional Goods Movement Plan and Implementation Strategy. SCAG also participated in efforts to develop state and national freight plans and associated freight network designation processes. In FY 2018-19, SCAG will continue to advance investment in transportation infrastructure that facilitates the efficient movement of freight through the region and provides effective environmental mitigation.

In FY 2017-18, SCAG completed the SR57/SR60 Confluence, Supplemental Needs Study for the SR-57/SR-60 Confluence area. The study was conducted as part of an ongoing effort to alleviate traffic congestion, safety and operational concerns within one of the worst congested hot spot locations in the region, state, and nation. The study identified, evaluated, and made a recommendation for a strategy to be moved into development phase. SCAG also collaborated closely with regional stakeholders to provide input into state and federal grant processes. Specifically, SCAG coordinated the responses to competitive federal and state discretionary grant funding opportunities.

SCAG also continued to support the Southern California National Freight Gateway Collaboration, a group comprised of key local, regional, state, and federal representatives formed to address infrastructure, environmental, and community quality of life challenges presented by the unprecedented growth in goods movement.

Continuing through FY 2018-19, SCAG will support ongoing analyses for the East-West Freight Corridor, working in coordination with partner agencies. Anticipated efforts will include further conceptual design assessment and consideration of potential financial options for the project. SCAG will also conduct its Last Mile Delivery Study to develop an understanding of current last-mile freight delivery conditions, highlight best practices, assess the feasibility of various solutions, and provide pragmatic recommendations to address existing and future delivery challenges that can be applied throughout the region.

Finally, SCAG will also develop an integrated passenger and freight rail forecast to understand physical and operational constraints, use agreements, and planned capacity improvements for regional rail facilities for the 2020 RTP/SCS.

B. Congestion Reduction

The existing congestion problems experienced in the region today are only expected to worsen due to projected growth in population and travel demand. Consequently, SCAG has engaged in a number of regional initiatives to identify strategies to manage congestion.

In 2010 and 2011, SCAG partnered with Caltrans to complete Corridor System Management Plans (CSMPs) that rely on a comprehensive performance analysis of congestion data to identify traffic bottlenecks, and the development of complex micro-simulation models to simulate corridor traffic. Using information from this analysis, the CSMPs identify near-and mid-term operational strategies to improve mobility, reliability, productivity, and safety. In FY 2017-18, SCAG initiated the I-105 Corridor Sustainability Study (CSS) a comprehensive multi-modal corridor study that examines the I-105 study area from a broad multi-modal perspective. The I-105 CSS will assess freeway and arterial congestion and will also consider additional corridor improvements, such as complete streets concepts, high occupancy vehicle (HOV) lanes, express lanes, and other advanced operational strategies. The goal is to recommend solutions that would improve air quality, system connectivity and efficiency, and reduce emissions, traffic congestion and improve safety. The I-105 CSS will develop local resources and build upon previous transportation efforts to create an integrated transportation system within and along the I-105.

A poorly maintained transportation system impedes traffic flow and creates unsafe condition for system users. SCAG's Regional Council recognizes this fact and has adopted greater commitments to system preservation in the RTP/SCS. In order to make progress on this commitment, SCAG initiated an effort in FY 2013-14 to develop a comprehensive database and monitor the condition of our transportation assets in an attempt to better manage these assets over the long haul and recommended needed adjustments to the broader policies related to system preservation in the 2016

RTP/SCS. In FY 2017-18, SCAG made significant progress on this important effort by analyzing the costs associated with transportation system preservation and achieving a state of good repair and will continue this work in FY 2018-19 for incorporation into the 2020 RTP/SCS.

In FY 2008-09, SCAG initiated a multi-year study to evaluate congestion pricing alternatives and their applicability in the SCAG region, conduct extensive public outreach and market analysis, and develop a financial plan and implementation strategy for a pilot initiative. The results of this first phase of the Express Travel Choices study fed directly into the 2012 RTP/SCS. A second phase of the Express Travel Choices study initiated in FY 2012-13 developed an implementation plan, including the build-out of the existing and planned managed network of express lanes across Southern California and integration with one or more pilot projects for cordon/area pricing within specific major activity centers. A regional concept of operations for express lanes throughout the region was completed in FY 2015-16 and revised in FY 2017-18. As a living document, additional revisions may be made in FY 2018-19 as appropriate. A feasibility study and concept of operations for a possible cordon pricing pilot project, including stakeholder engagement, was completed in FY 2016-17 and revised in FY 2017-18. Ongoing evaluation of potential mobility innovations and incentives to better manage traffic will continue into FY 2018-19.

SCAG continues to work on improving our Congestion Management Process through better coordination and integration of all of our transportation planning and programming activities, as well as updates of our RTP/SCS and FTIP. As part of this improvement, in 2011, SCAG developed new performance criteria to assess the impacts of non-recurring congestion and developed appropriate strategies to address them in the 2016 RTP/SCS. Furthermore, in FY 2016-17, SCAG enhanced its process and documentation of how programmed highway capacity projects are developed and integrated with complementary TDM and TSM strategies.

Intelligent Transportation Systems (ITS) are important elements of SCAG's congestion reduction strategies. Ensuring coordination and consistency of implementation of ITS strategies on a region-wide basis and between jurisdictions is crucial to maximizing the benefits of ITS projects. SCAG continues to facilitate such coordination efforts through its regular and timely updates of the regional ITS Architecture. SCAG initiated its latest update of the regional ITS Architecture in FY 2016-17 and anticipates completing this effort by the end of FY 2017-18.

As a subcomponent to ITS, integrated corridor management (ICM) strategies also play a vital role towards reducing congestion. Since 2012, SCAG has been working closely with California PATH, Caltrans, Metro, and local agencies to develop the first Integrated Corridor Management (ICM) pilot project within the SCAG region along the Interstate 210 (I-210) corridor. The purpose of the pilot project is to look at all opportunities to move people and goods in the most efficient manner possible, to ensure the greatest potential gains in operational performance. This includes seeking ways to improve how arterials, highways, transit and parking systems work in conjunction with one another. The pilot is expected to be completed by winter of 2018.

C. Sustainability Program (Land Use/Transportation Integration)

SCAG's Sustainability Program is a core effort for implementing the 2016 RTP/SCS. The program demonstrates that the region can achieve both mobility and air quality goals through local land use and policy changes along with targeted transportation investments. Overall objectives of the Sustainability Program are met through the following projects:

2016 RTP/SCS: A priority for the Sustainability Department is to implement policies for the 2016 RTP/SCS that will meet state guidelines for greenhouse gas emissions reductions.

Sustainability Planning Grants: Continue work on ongoing Sustainability Planning Grant projects and initiate new collaborative assistance to member local governments and communities for coordinating sustainable transportation, land use and regional policies and issues in local planning. Emphasis will include local and regional planning for greenhouse gas reductions, locally-applied "Green Region Initiative" strategies, public health impacts related to transportation activities, and assistance in General Plan updates.

Local Technical Assistance: Facilitation of the Toolbox Tuesdays Training Series to build local capacity in innovative and integrated transportation and planning tools.

SCAG Sustainability Awards: Awards Program for outstanding examples of integrated transportation and land use planning, implementing the RTP/SCS at the local level.

CTC Joint Work Programs: Policy coordination among SCAG and CTCs for various sustainability issues related to implementation of the 2016 RTP/SCS and SCAG/CTC Joint Work Programs, such as First mile/Last mile, complete streets, climate action plans, adaptation, and active transportation.

Projects to be undertaken in FY 2018-19 include:

- Begin development of growth scenarios and advanced land use strategies including robust targeted public outreach to community based organizations (CBOs) and other regional stakeholders for the Draft 2020 RTP/SCS
- Continue to administer new Sustainability Planning Grant projects awarded in spring 2017; evaluate and refine program guidelines in preparation for a new call for proposals in 2018.
- Continue deployment of High Quality Transit Area (HQTA) Pilot Program to align with key regional land use strategies and local polices. This Program was initiated in 2017-18 with five cities that seek to promote infill near transit that encourages center-base development, pedestrian and biking infrastructure, housing affordability, and flexible parking requirements.
- Develop strategies for achieving more ambitious per-capita SB-375 GHG reduction targets established by the California Air Resources Board, including use of findings from the completed 2050 Greenhouse Gas (GHG) Pathways Study consistent with the AB 32 Scoping Plan.
- Manage the 2018 Sustainability Awards presented at the SCAG General Assembly

- Conduct Toolbox Tuesday's training events.
- Conduct Sustainability Community Working Group meetings in conjunction with developing the SCS.
- Continue implementation of SCAG's Open Space work plan, through convening the SCAG Natural and Working Lands Working group and eventual incorporation of natural lands policies in the Draft 2020 RTP/SCS
- Continue providing Technical Assistance and workshops for the Affordable Housing Sustainable Communities (AHSC) grant program and other GGRF programs
- Continue as Regional Coordinator for the Civic Sparks program, with an emphasis on continued development of the Green Region Sustainability Indicators project
- Continue to serve as the Regional Clean Cities Coordinator
- Focus on mobility innovations including determining the viability of deploying electric vehicles and associated charging infrastructure in the region, and evaluating the impact of transportation network companies on travel behavior.

D. Regional Transit and High Speed Rail Planning

During FY 2018-19, SCAG will continue coordinating with transit operators in its planning efforts, as required by the Federal regulations for metropolitan transportation planning, and pursuant to the Memoranda of Understanding (MOUs) between SCAG and transit operators in the region that was updated and executed in FY 2017-18; SCAG will accomplish this through ongoing meetings of the Regional Transit Technical Advisory Committee (RTTAC).

Staff will continue to monitor and participate in the Federal Transit Administration's (FTA's) rulemaking process to implement new requirements from the Moving Ahead for Progress in the 21st Century Act (MAP-21) and the Fixing America's Surface Transportation (FAST) Act. Staff will coordinate with the RTTAC and the County Transportation Commissions (CTCs) to address new rulemaking affecting transit safety and transit asset management (TAM). In FY 2017-18, SCAG began discussions with the transit operators regarding TAM target setting, and in FY 2018-19 will work with the transit operators to establish TAM targets for the 2020 RTP/SCS update. Also in FY 2017-18, SCAG updated the MOUs with its transit partners and CTCs to incorporate new federal rulemaking and requirements for performance-based planning.

During FY 2017-18, SCAG and the University of California, Los Angeles (UCLA) Institute of Transportation Studies released a report entitled "Falling Transit Ridership," which sought to identify the causes of ridership declines in the region. This genesis of this report was the ongoing staff efforts to monitor annual transit system performance based on National Transit Database data, which identified falling per capita transit ridership as a cause for concern. The SCAG/UCLA report identified dramatic increases in vehicle ownership, particularly among population groups most likely to take

transit, as the likely primary cause. This finding will help to guide development of strategies for the 2020 RTP/SCS update to ensure the region will continue to meet all of its mobility, air quality, and sustainability goals.

During FY 2017-18, SCAG continued work on two major transit planning studies to improve connectivity between Los Angeles and San Bernardino Counties and between Los Angeles and Orange Counties. The studies focus on strategies to improve connectivity in the urban and commuter rail networks. Work on the Los Angeles-San Bernardino study is expected to conclude in FY 2017-18 while work on the Los Angeles-Orange study is expected to conclude in FY 2018-19. In FY 2018-19, SCAG expects to initiate two additional studies, one to develop a regional paratransit demand forecast, and another to develop an integrated freight and passenger rail forecast. Both study efforts will directly inform the 2020 RTP/SCS update on critical transit and rail issues affecting the region.

Furthermore, staff will continue to manage and assist with state and federal funding programs, including overseeing the Caltrans 5304 Sustainable Communities Planning Grants. SCAG will also cooperate with our regional partners in a variety of studies and projects throughout the region. Staff expects to assist SCAG's Subregions and CTCs with proposal reviews, system performance studies, and a variety of project planning activities.

With respect to High Speed Rail (HSR), staff will continue to coordinate implementation of the Memorandum of Understanding (MOU) between the California High-Speed Rail Authority, CTCs, Metrolink, San Diego Association of Governments (SANDAG) and SCAG for the programming of \$1 billion in HSR funds to improve the region's existing passenger rail services. In FY 2018-19, SCAG will continue to work with local stakeholders and state agencies to ensure an engaged and participatory planning process for the proposed state HSR system in accordance with the cooperative MOU that is in place.

E. Corridor & Other Planning Studies

SCAG coordinates, directs and participates in a number of corridor studies and other planning studies, many with county transportation commissions, Caltrans, subregional entities, and/or other partners. While each study has its unique objectives, all are designed to develop a comprehensive approach to addressing corridor congestion problems by considering operational improvements in conjunction with critical capacity enhancements and leveraging other modes of travel such as transit, walking, and/or biking. Ultimately, the goal is to better inform regional transportation decision-making. Below is a list of ongoing corridor studies

- SR-710 North Study (Metro)
- I-710 Corridor Project (Metro)
- I-605 Corridor Improvement Project (Metro)
- I-210 Connected Corridors Pilot (Metro)
- I-105 Express Lanes Project (Metro)

- I-15 Corridor Project (SBCTA)
- I-105 Corridor Sustainability Study (SCAG)

F. Infrastructure Financing

New funding sources are needed to address the mobility, air quality, and land use needs facing the region. Several promising transportation and land-use strategies will require significant funding levels for the region to adequately address the challenges in these areas. Without an infusion of sufficient funding, the region will not be able to demonstrate the required attainment of health-based national ambient air quality standards or comply with State requirements for greenhouse gas emission reductions.

Despite passage of Senate Bill 1 (Road Repair and Accountability Act of 2017), local streets and roads and bridges are not projected to meet state of repair performance measures without additional funding. In FY 2018-19, resources will continue to be dedicated to identifying more efficient means of generating revenue to support transportation system investments and associated mitigation needs as part of the development of the technical and policy framework for the 2020 RTP/SCS financial plan. This will include analyses of financial conditions, identification of new innovative financing opportunities, and investigation of various public-private partnership initiatives. SCAG will also continue efforts to provide technical input and analyses associated with FAST Act federal surface transportation reauthorization efforts.

G. Active Transportation

SCAG's Active Transportation Program works to integrate active transportation into the regional transportation planning processes and support local actions to implement the regional plan. During FY 2017-18, SCAG continued to work with a wide variety of active transportation stakeholders to develop plans, conduct analysis, and access funding to advance policies adopted in the 2016 RTP/SCS. Staff coordinated regular meetings of two working groups focused public health and active transportation to facilitate regional collaboration on the policies included in the 2016 RTP/SCS as well as share best practices on an on-going basis. Staff continued to enhance the Active Transportation Database to support local planning and enhance analysis of active transportation investments in the 2020 RTP/SCS.

SCAG also collaborated with the CTCs to add new projects and program an additional \$40 million of Senate Bill 1 funding into the Regional Active Transportation Program (ATP) to augment the project list approved in the third cycle of the California Active Transportation Program (ATP). The project selection process included issuing a supplemental call for projects for planning and non-infrastructure projects to ensure our region continues to build capacity to proposed and deliver quality active transportation projects. SCAG represents the large MPOs on the statewide Active Transportation Program Technical Advisory Community and facilitates ongoing discussions with the county transportation commissions and other regional stakeholders to enhance the selection, delivery and evaluation of ATP projects. In

addition, SCAG provided input on the Cycle 4 Statewide ATP Guidelines and received approval from the Regional Council on the Cycle 4 Regional ATP Guidelines.

Staff continued work on the "Go Human" active transportation safety and encouragement campaign, a program funded by an ATP grant, California Office of Traffic Safety, Mobile Source Reduction Committee grants, and local sponsorships. Go Human includes three main components: Advertising Campaign, Community Outreach/Demonstration Events, and development of Active Transportation Training Toolkits and facilitation of training workshops. Staff activities in FY 2017-18 focused on refining and re-running the media and advertising campaign and delivering Community Outreach/Demonstration Events. Relaunched in May 2018, the Go Human campaign increased local awareness and education on rules of the road and how to walk, bike and drive safely. *Go Human* events advanced local planning across six communities by educating residents on potential improvements and generating public support and feedback on local plans. The Go Human events also implement regional policies aimed at increasing safety and investment in active transportation by increasing education and awareness of the road and critical role of walking and biking in regional mobility.

Projects to be undertaken in FY 2018-19 include:

- Continued implementation of the Go Human campaign focusing on Go Human events in up to 15 communities
- Implementation of the SCAG Active Transportation Disadvantaged Communities Planning Initiative with ATP grant funding to develop active transportation plans in six disadvantaged communities and create a model for efficient development of plans leveraging SCAG planning, analysis and outreach tools.
- Partnering with local agencies to deliver active transportation planning and capacity building grants through the Sustainability Planning Grant Program.
- Develop consensus and seek approval from the Regional Council and the California Transportation Commission on the 2019 California Active Transportation Program, and continued support for delivery of projects awarded funding through Cycle 2 and 3.
- Continued enhancements and promotion of the Active Transportation Database to expand availability of bicycle and pedestrian data to inform local and regional planning.
- Preparation of the public health analysis and active transportation plan to be included in the 2020 Regional Transportation Plan/Sustainable Communities Strategy, including continued facilitation of working groups and enhanced outreach.
- Providing technical assistance to local agencies to increase their readiness and competitiveness for State Active Transportation Program and Cap & Trade funds.
- Enhance modeling tools to project impacts of active transportation investments on vehicle miles travelled and public health.

• Continue to explore and facilitate partnerships between public health, water, energy and transportation agencies to advance multi-benefit projects in support of policies in the RTP/SCS.

H. Safety

Safety is a primary concern in developing transportation projects. SCAG participates with partner agencies in developing and recommending safety strategies and policies. SCAG serves on the California Strategic Highway Safety Plan (SHSP) Steering Committee. The 2016 RTP/SCS includes safety recommendations for local governments that are consistent with the recently approved State SHSP.

During FY2017-2018, SCAG coordinated with the local stakeholders to develop region wide safety targets, which it reported to the state in February 2018. In March 2018, SCAG kicked off a Safety Working Group to help develop a Regional Safety Strategy, which will later be incorporated into the 2020 RTP/SCS. SCAG will continue to monitor safety in the region and its progress towards meeting its established targets. In addition, SCAG will maintain its working relationships with the SHSP Steering Committee and other relevant stakeholder groups.

I. Environmental Planning and Compliance

Compliance with federal Clean Air Act (CAA) is a complicated and challenging requirement for SCAG, requiring detailed data collection, complex computer modeling, extensive inter-agency coordination, as well as specialized technical analysis and report writing. Staff works closely with regional, State, and Federal partner agencies to resolve numerous challenging issues in meeting the CAA requirements, including transportation conformity for 18 nonattainment and maintenance areas within the SCAG region. In FY 2017-18, SCAG adopted and received FHWA/FTA approval of the conformity determinations for the 2016 RTP/SCS Amendment #2 and four 2017 FTIP Amendments. Staff prepared conformity analyses for the Draft 2019 FTIP and the 2016 RTP/SCS Consistency Amendment #3. In addition, staff processed one formal TCM substitution as well as on-going TCM timely implementation requests from CTCs.

Staff continued to participate in the development of AQMPs (Ozone/ $PM_{2.5}/PM_{10}$ SIPs) and fulfilled SCAG's federal and state air quality planning responsibilities. In FY 2017-18, staff collaborated with ARB and local air district in developing new ozone, $PM_{2.5}$, and PM_{10} transportation conformity budgets in the respective Imperial County SIPs.

Staff reviewed and evaluated the Transportation Corridor Agencies and Orange County Transportation Authority (OCTA) Average Vehicle Occupancy Program Monitoring Reports and issued certification letters. Staff reviewed and approved the reporting of the Congestion Management and Air Quality (CMAQ) funded projects; and uploaded the required project information into the Federal User Profile and Access Control System (UPACS) – CMAQ database. Staff facilitated interagency consultation for

RTP, FTIP, and project-level transportation conformity through the federally required Transportation Conformity Working Group (TCWG).

Compliance with the California Environmental Quality Act (CEQA) provisions is also required of SCAG when it serves as the lead agency with the responsibility for preparation of the environmental documentation for the RTP/SCS and other projects. Staff actively participates in the development of environmental documentation, such as the Program Environmental Impact Report (PEIR) for the RTP/SCS, to ensure regulatory compliance with the CEQA provisions as well as other applicable federal and state laws. Staff works closely with local and regional agencies and stakeholders and conducts consultation and public outreach during the preparation of environmental documentation for the RTP/SCS. In FY 2017-18, staff continued to ensure compliance with CEQA by preparing Addendum No. 1 to the PEIR for the 2016 RTP/SCS to capture any potential environmental impacts resulting from Amendment No. 1 to the 2016 RTP/SCS. Additionally, for FY 2017-18, staff ensured compliance with CEQA by conducting Addendum No. 2 to the PEIR for Amendment No. 2 to the 2016 RTP/SCS. Staff will continue to monitor and provide environmental documentation for additional amendments that may occur. In FY 2018-19, staff is scheduled to initiate the PEIR for the 2020 RTP/SCS which include releasing Notice of Preparation (NOP), hosting scoping meetings, consultations with Tribal Nations, documenting the regulatory framework and conducting environmental analysis, among others. Staff has and will continue to seek input from SCAG's Policy Committees in support of the environmental document.

In preparing for the 2020 RTP/SCS PEIR in FY 2018-19, SCAG will continue its past practices, consistent with Planning and Environmental Linkages (PEL) approach, to streamline the process by aligning PEIR alternatives with RTP/SCS planning scenarios, and also using the same set of planning information from the RTP/SCS in the PEIR. In addition, SCAG will also promote the usage of PEL among lead agencies in the region (e.g., county transportation commissions, local jurisdictions, etc.) to (1) consider environmental, community, and economic goals early in the transportation planning process, and (2) use the information, analysis, and products developed during planning to inform the environmental review process, thereby streamlining the NEPA and CEQA process and reducing delays in project implementation.

In FY 2018-19, SCAG will continue to oversee and/or provide support for required air quality planning, analyses, documentation and policy implementation, including the conformity analysis and determination for the draft 2020 RTP/SCS and any amendments to the 2016 RTP/SCS and 2019 FTIP as well as adoption and federal approval of conformity determination for the 2019 FTIP and the 2016 RTP/SCS Amendment #3. Staff will also continue to collaborate with the ARB and air districts in the SCAG region in developing/finalizing any AQMPs/SIPs, including setting appropriate new emission budgets to meet federal conformity requirements. Staff will facilitate federally required interagency consultation via the TCWG, continue the process to ensure the timely implementation of TCMs, and track and participate in relevant air quality rulemaking and policy development. Staff will also continue to participate in numerous air quality related working groups and advisory committees.

J. Regional Growth Forecasting, Policy Analysis, and Data/GIS Support

Major forecasting and data/GIS projects undertaken in FY 2017-18 included:

- Continued building on state-of-the-art forecasting methodology and data/statistics support such that regional growth estimates and forecasts are technically sound and meet the Best Practices of MPOs general forecasting practices
- Continued technical work and subregional outreach for the 2020 RTP/SCS, including initiating
 one-on-one meetings with all 197 local jurisdictions and tribal nations in the SCAG region to
 refine growth estimates and land use data and the generation of Data/Map Books for each
 jurisdiction with data elements for local review.
- Continued to work with a panel of experts and other stakeholders to develop the most advanced methodology and reasonable assumptions to develop estimates and forecasts at the regional and county level
- Incorporated the new information from the American Community Survey into the growth forecast process; responded to the legal requirement of SB 375; provided advanced research and technical support for special projects on regional growth forecasts and estimates
- Continued SCAG's role as a Regional Data Center of the US Census Bureau, thereby expanding our role to promote the utilization and dissemination of census data to regional stakeholders
- SCAG has strengthened its relationships with Southern California's universities and colleges, along with international research and planning partners, to expand the knowledge base and enhance the quality of long range planning activities. SCAG hosted the annual SCAG/USC Demographic Workshop and supported a SCAG Planning Studio class at Cal Poly Pomona. SCAG's delegation of elected officials and planning staff were invited to China, South Korea, and Japan to share and learn best planning practices in the areas of big data and analytics, demographics, resilience, emergency responses, and earthquake preparation and planning.

Additionally in FY 2017-18, SCAG continued to work with local jurisdictions and partner agencies in the SCAG region by implementing its GIS Services Program, which provides technical assistance to local jurisdictions in the development of their GIS and data capabilities. A specific component of the GIS Services Program was the undertaking of introductory, intermediate and advanced GIS software training workshops for participating local jurisdictions, as well as providing GIS services for additional cities, as well as the provision of intern staffing support to improve local technical know-how.

SCAG has also provided technical support to local jurisdictions looking to utilize new economic development and tax increment financing tools available through state legislation – Enhanced Infrastructure Financing Districts (EIFDs) and Community Revitalization and Investment Authorities (CRIAs). This year, SCAG established a screening criteria and interactive tool to evaluate the viability of any neighborhood in the SCAG region to establish an EIFD or CRIA. SCAG has also partnered with other entities to conduct numerous pilots examining the financial viability of establishing an EIFD or

CRIA to support regionally significant projects, and Los Angeles County Metropolitan Transportation Authority ("Metro") utilized SCAG's criteria and tool to evaluate grant awardees for their recent round of Transit Oriented Development Planning Grants.

SCAG continued to implement an Enterprise GIS system to further integrate all aspects of regional planning as well as acquire, develop and process regional data as part of fulfilling our strategic goal of being a central source of data/information about the Southern California, in addition to fulfilling socioeconomic data requests from member agencies, universities, other public agencies and the general public in support of their planning/information needs.

Also, in FY 2017-18, SCAG initiated a new program aimed at increasing the adoption of new technology and the accessibility of data and analytics to our partner agencies and the general public. The Future Communities Initiative (FCI) is a three-year program that will provide guidance, support data coordination and standardization, expand partnerships, and provide resources to local jurisdictions throughout Southern California. This program will specifically result in studies and strategies for local cities that outline the steps needed to become "smart communities", develop a process for identifying data sets that could benefit from regional standardization and create processes for coordinating data collection, explore opportunities for engagement with supportive initiatives and build partnerships that magnify impact, and pursue resources for planning and implementation of open data, big data, and new technology initiatives.

In FY 2018-19, major forecasting, policy analysis, and data/GIS initiatives will include:

- Continue to provide state-of-the-art forecasting methodology and data/statistics such that regional growth estimates and forecasts are technically sound, and set the standard for MPO growth forecasting practice;
- Participate in policy development and provide research/planning analysis for the implementation of the 2016 RTP/SCS, and for strategic initiatives, corridor studies, and scenario development;
- Continue work for the development of the 2020 RTP/SCS;
- Share knowledge related to data/GIS analyses of RTP/SCS at numerous conferences;
- Address the emerging research needs on the relationship of demographic change, built environment, travel behavior and health;
- Collect, process and analyze data used in support of the planning activities of the agency;
- As a Regional Information Center, provide data support and mapping capabilities to better serve the needs of our partner agencies;
- Provide data and information to stakeholders to promote economic development and enhance the effectiveness of decision-makers;

- Leverage data sharing opportunities among public agencies throughout the region and maximize data sharing while minimizing agency costs;
- Continue SCAG's Internship Assistance Program that places interns at local jurisdictions with GIS/planning needs;
- Provide staff support to local jurisdictions in GIS and planning related projects and products;
- Initiate program of demonstration projects to upstart new resources and services, so that local jurisdictions better serve their constituents;
- Provide forum for data/GIS users to network to share information, as well as address common concerns or challenges;
- Provide training, expert clinics, on-site technical support appointments, data updating/sharing/standardizing and other GIS services to our local jurisdictions;
- Continue the implementation of an Enterprise GIS system (including GIS hardware/software, GIS database, and GIS applications);
- Enhance the partnership with Southern California's universities and colleges to improve SCAG's planning capabilities;
- Expand global cooperation with diverse international research, educational, and government organizations to foster research capabilities and address various planning issues related to land use, housing, transportation, environment, health, etc.;
- Continue work on SCAG's EIFD and CRIA pilot projects to provide local assistance for economic development, job creation, and potential financing for infrastructure investments.
- Initiate the Future Communities Pilot Program, which will provide grants to local jurisdictions for the deployment of new technology to reduce transportation demand and improve government service provision;
- Begin work on the FCI Regional Data Platform, which will serve as a clearinghouse of public sector data updated on a transactional basis and accessible via interactive viewers – thereby democratizing data for public engagement with government. It will be security enabled for certain datasets (protecting our systems and people) and will include standardization of regionally significant datasets;
- Initiate the FCI Policy Lab/Tool Builder, which will foster research opportunities in partnership with regional universities and international organizations on common issues, helping us move beyond data for its own sake to insights and solutions to shared challenges;
- Conduct the FCI Data Science Fellowship, which will provide fellows to regional and local agencies to initiate open data platforms, conduct data analysis, and accelerate the adoption of new technologies (bridging the staffing resources gap);

- Establish and engage with the Future Communities Initiative Advisory Committee which will also provide ongoing input and governance on Initiative activities – helping us to promote fairness and equity for serving low resourced and disadvantaged communities, as well as overall data protection; and
- Conduct the Future Communities Forum, which will be an annual engagement to foster knowledge transfer between SCAG, our local jurisdictions, and our international partners on the future of cities across the globe.

K. Small Area Forecasting and Modeling Support

Major forecasting, data, and modeling projects undertaken in FY 2017-18 included:

- Continued building state-of-the-art forecasting methodologies, programs, software, and data/statistics to support regional growth estimates and travel forecasts that are technically sound and meet MPO Best Practices;
- Continued data gathering, evaluating, and analytical processes including parcel information, censuses, annexations and employment data for building the 2020 RTP/SCS base year socioeconomic estimates and growth projections;
- Developed the 2020 RTP/SCS preliminary draft growth forecast including Population, Household, and Employment for the region;
- Led the collaborative efforts on developing tailored socioeconomic estimates and projections with member agencies, including Los Angeles City, Los Angeles County, San Bernardino County Transportation Authority and others;
- Developed more than 30 scenario data sets to support model operation for SCAG plans/programs;
- Enhanced and maintained Scenario Planning Model (SPM) by in-house staff:
 - Implemented 20+ updated datasets for the 2020 RTP/SCS local input and envisioning process into SPM Data Management (SPM-DM) system and released SPM-DM to 197 local jurisdictions in the SCAG region.
 - Continued maintenance and monitoring of the SPM system and provided technical assistance and trainings to local jurisdictions
 - Initiated an assessment of SPM Scenario Development and Analysis (SPM-SD) system including its analysis modules to best support the scenario development and modeling needs for successful adoption of the 2020 RTP/SCS.
 - Continued to play a key role in a collaborative effort in building a strong user community where future enhancement can occur through collective efforts in building a shared knowledge base

- Provided transportation modeling and emissions analyses to support the following SCAG plans/programs: the third amendment for the 2016 RTP/SCS Amendment, FTIP development, and emissions target setting exercises;
- Continued to update and enhance SCAG's Travel Demand Models, including Activity-based Model and inter-regional heavy-duty truck model, for the 2020 RTP/SCS. Completed traffic data collection and travel survey analysis for the base year model validation;
- Continued efforts to enhance emissions modeling capabilities for application in the conformity analysis, greenhouse gas emission, and environmental justice analysis;
- Assisted subregional agencies in developing subregional models by providing model prototypes, modeling data, technical support, and model documentation. Completed the update for Imperial County Transportation Model;
- Completed 200+ modeling and socioeconomic data requests from SCAG members and other stakeholders;
- Through the Modeling Task Force and other outreach activities, promoted interagency consultation and coordinated modeling activities with transportation commissions, Caltrans, ARB, air districts, and State/Federal agencies;
- Provided leadership to the Southern California modeling community by coordinating national, state, regional and local modeling programs;
- Provided technical assistance and modeling services to regional and subregional agencies in support of their modeling program and to promote model consistency; and
- Participated in policy development and provide modeling/planning analysis for SCAG's planning program, strategic initiatives, corridor studies, emissions target setting exercises, and scenario development. Provided technical support and analysis to SB 743 and MAP 21 projects.

Major forecasting, data, and modeling initiatives for FY 2018-19 include:

- Develop the draft 2020 RTP/SCS growth forecast data at jurisdictional and small area levels;
- Continue to work with local jurisdictions by analyzing and incorporating comments and new information to better reflect growth visions from local's perspectives;
- Continue to collaborate with LA city, LA county, San Bernardino County Transportation Authority and others to build customized growth forecasts;
- Continue to develop model input data for transportation modeling on major SCAG plans/programs;
- Continue to update and maintain SCAG's Models, including Travel Demand Model, Scenario Planning Model, Heavy-duty Truck Model, and Air Quality Model;
- Provide transportation modeling and emissions analyses to support SCAG plans/programs;

- Provide leadership to the Southern California modeling community by coordinating national, state, regional and local modeling programs;
- Enhance communications and interagency consultations by conducting bi-monthly Modeling Task Force Meetings;
- Provide technical assistance and modeling services to regional and subregional agencies in support of their modeling program and to promote model consistency; and
- Continue to fulfill transportation and socioeconomic data requests from member agencies, universities, other public agencies and the general public in support of their planning/information needs.

L. Performance Measures

SCAG has been monitoring the performance of the region through the collection and analysis of a wide range of socio-economic, transportation, and environmental data. Table 1 shows the performance indicators SCAG used to evaluate the 2016 RTP/SCS. SCAG has initiated the process of developing the set of performance goals, objectives, and measures to guide development of the 2020 RTP/SCS. SCAG has been collaborating with FHWA and Caltrans on the development of a regional performance-based planning and reporting program as mandated by MAP-21 and the FAST Act. SCAG will continue to coordinate with FHWA and actively participate in statewide technical work groups, workshops, and other inter-agency performance monitoring information exchange opportunities, as part of this national performance-based planning and reporting program.

To ensure the Federal Transportation Improvement Program (FTIP) is on-target and consistent with RTP objectives and budgets, SCAG monitors FTIP implementation through:

- An enhanced FTIP database
- Regional transportation monitoring programs, including the Highway Performance Monitoring System (HPMS) and a Regional Transportation Monitoring Information System (RTMIS)
- Periodic administrative or FTIP technical amendments reflecting transportation policy or budget changes, shifting conditions, or transportation project additions or deletions

Additional projects to be undertaken in FY 2018-19 include:

- Coordinate with all 197 local jurisdictions (cities and counties) in the SCAG region to facilitate collection of data for the Highway Performance Monitoring System (HPMS)
- Data collection and analysis in support of various Regional Performance Assessment activities, including the annual Average Vehicle Occupancy (AVO) analysis and reporting for two Orange County toll facilities

- Incorporate use of the web-based 'REVISION' regional growth monitoring tool, based on the transformative upgrade of the 'CALOTS' application, to support performance monitoring of the regional Sustainable Communities Strategy (SCS)
- Conduct various performance monitoring analyses to track regional and local implementation of 2016 RTP/SCS
- Initiate and complete the development of the biennial Local Profiles Reports for all local jurisdictions in the SCAG region.

Table 1: 2016 RTP/SCS Outcomes and Performance Measures

Outcome	Performance Measure	Definition	Performance Target					
	Share of growth in High Quality Transit		Improvement (increase) over No					
Location Efficiency	Areas (HQTAs)	households and employment in HQTAs	Project Baseline					
	Land consumption	Greenfield land consumed and refill land consumed	Improvement over No Project Baseline					
	Vehicle Miles Traveled (VMT) per capita	Average annual vehicle miles driven per person	Improvement (decrease) over No Project Baseline					
	Transit mode share	The share of total trips that use transit for work and non-work trips	Improvement (increase) over No Project Baseline					
	Average distance for work or non- work trips	The average distance traveled for work or non-work trips	Improvement (decrease) over No Project Baseline					
	Percent of trips less than 3 miles	The share of work and non-work trips which are fewer than 3 miles	Project Baseline					
	Work trip length distribution	The statistical distribution of work trip length in the region	Improvement (decrease) over No Project Baseline					
Mobility and Accessibility Safety and Health	Person delay per capita	Delay per capita can be used as a supplemental measure to account for population growth impacts on delay	Improvement (decrease) over No Project Baseline					
	Person delay by facility type (mixed flow, HOV, arterials)	Delay: Excess travel time resulting from the difference between a reference speed and actual speed	Improvement (decrease) over No Project Baseline					
	Truck delay by facility type (highways, arterials)	Delay: Excess travel time resulting from the difference between a reference speed and actual speed	Improvement (decrease) over No Project Baseline					
	Travel time distribution for transit, SOV, and HOV modes for work and non- work trips	Travel time distribution for transit, SOV, and HOV for work and non-work trips						
	Collision rates by severity and by mode	Collision rate per 100 million vehicle miles by mode (all, bicycle/pedestrian); and number of fatalities and serious injuries by mode (all, bicycle/pedestrian)	Improvement (decrease) over No Project Baseline					
	Criteria pollutants emissions	CO, NOX, PM2.5, PM10, and VOC	Meet Federal Transportation Conformity requirements					
	Air pollution-related health measures ¹	Pollution-related respiratory disease incidence and cost	Improvement (decrease) over No Project Baseline					
	Physical activity-related health measures ²	Physical activity/weight related health issues and costs	Improvement (decrease) over No Project Baseline					
	Mode share of walking and biking	Mode share of walking and biking for work and non-work trips	Project Baseline					
Environmental Quality	Criteria pollutant and greenhouse gas emissions	CO, NOX, PM2.5, PM10, and VOC emissions; and per capita greenhouse gas emissions (CO2)	Meet Federal Transportation Conformity requirements and state S 375 per capita GHG reduction targe					
	Additional jobs supported by improving competitiveness	Number of jobs added to the economy as a result of improved transportation conditions which make the region more competitive	Improvement (increase) over No Project Baseline					
Economic Opportunity	Additional jobs supported by transportation investment	Total number of jobs supported in the economy as a result of transportation expenditures						
	Net contribution to Gross Regional Product	Increase in Gross Regional Product due to transportation investments and increased competitiveness	Improvement (increase) over No Project Baseline					
Investment Effectiveness	Benefit/Cost Ratio	Ratio of monetized user and societal benefits to the agency transportation costs	Greater than 1.0					
System Sustainability	Cost per capita to preserve multimodal transportation system to current and state of good repair condition	Annual cost per capita required to preserve the regional multimodal transportation system to current conditions	Improvement (decrease) over Base Year					
	State Highway System Pavement Condition	Share of distressed State Highway System lane miles	Improvement (decrease) over No Project Baseline					
	Local Roads Pavement Condition	Pavement Condition Index (PCI) for local roads	Improvement over No Project Baseline					

IV. Implementation of the RTP/SCS and FTIP

During the past fiscal year, SCAG prepared two amendments to the 2016 RTP/SCS to allow for critical transportation improvement projects throughout the region to move forward in a timely manner.

The focus of FY 2018-19 will be to maintain, manage, and guide the implementation of the 2016 RTP/SCS and develop the 2020 RTP/SCS. SCAG will ensure that the 2020 RTP/SCS is consistent with state and federal requirements while addressing the region's transportation needs.

The Federal Transportation Improvement Program (FTIP) is a multimodal list of capital improvement projects programmed over a six-year period. The FTIP is the program that implements the RTP. The currently approved FTIP is the 2017 FTIP and was federally approved and found to conform on December 16, 2016. The program contains approximately \$27.7 billion worth of projects in FY2016-2017 – 2021-2022. The FTIP must include all federally funded transportation projects in the region, as well as all regionally significant transportation projects and projects for which approval from a federal agency is required regardless of funding source. The FTIP is developed to incrementally implement the programs and projects in the Regional Transportation Plan. The FTIP is amended on an on-going basis, as necessary, thereby allowing projects consistent with the Regional Transportation Plan to move forward toward implementation.

During FY 2017-18, the 2017 FTIP was updated with six amendments, six Administrative Modifications and one RTP/FTIP consistency amendment. SCAG, by working closely with the federal and state funding agencies and its regional partners, successfully received approval for these FTIP Amendments and Administrative Modifications. Also, the SCAG Regional Council approved the 2019 FTIP Guidelines at their September 2017 meeting. Approval of these guidelines marks the start of the 2019 FTIP development cycle. Staff expects a December 2018 approval of the 2019 FTIP by the Federal Agencies and for the 2017 FTIP to expire.

V. Overview of Public Participation and Consultation

A. Public Participation Plan Update

Following the anticipated adoption of its most recent Public Participation Plan in June 2018, SCAG will begin implementing a comprehensive public information and communications program to inform stakeholders, partners and the general public about agency programs, plans, services and initiatives using the Internet, social media, video production, graphic design, publications, e-newsletters, op-eds, fact sheets, media advisories and news releases.

SCAG's updated Public Participation Plan outlines how the agency operates and sets forth goals and strategies for increasing public information and engagement. Consistent with state and federal regulations, SCAG provides for formal comment periods for the 2020 RTP/SCS, FTIP, as well as other major plans, projects and programs. The agency also engages in regular activities that provide on-

going opportunities for public input at public meetings, hearings and workshops, surveys of meeting attendees, an always-available 'contact us' link and form on the agency website and 'contact us' form (print or online) in the adopted Public Participation Plan. SCAG reviews, addresses and incorporates as appropriate, all comments received. In addition, the 2018 Public Participation Plan includes language to assist transit operators who are relying on SCAG's FTIP public participation process to satisfy the public participation requirements for their Program of Projects, under 49 U.S.C. Section 5307.

In September 2017, an update to SCAG's Title VI Program which includes the agency's Language Assistance Program for Limited English Proficient populations was adopted by the Regional Council. The updated Title VI Program was subsequently approved by the Federal Transit Administration in October 2017. SCAG is required to demonstrate its compliance with the Department of Transportation's Title VI requirements every three years. With the development of its Language Assistance Program, SCAG is working toward improving its strategies to engage and seek input from traditionally underserved populations by providing translations of key materials into Spanish, Chinese, Korean and Vietnamese, the four most spoken languages in the region's households other than English. The Language Assistance Program also provides for interpreters in these languages at workshops and other public meetings, with 48 hours notification.

During FY 2017-18, SCAG continued engagement of stakeholder groups on specific study areas following approval of the 2016 RTP/SCS and to seek input on how best to implement some of the strategies. These topic areas include open space, public health and active transportation. In addition, SCAG provided public notice for two amendments to the 2016 RTP/SCS and 2017 FTIP. Outreach included:

- Alerts via email, social media, electronic newsletters and in-person presentations to local governments, community organizations, academic groups, business organizations, environmental groups, Tribal Governments, under-represented groups and traditionally underserved groups.
- Increased opportunities for public engagement through video and web conferencing.
- Updating the 2016 RTP/SCS website to provide the latest news, notices of public comment period dates/times, and opportunities to provide comment.

B. SCAG Regional Offices

In addition to its main headquarters in Los Angeles, SCAG operates a Regional Office in five (5) other counties in Southern California and has videoconferencing sites at three (3) additional locations throughout the region. Videoconferencing further enhances the agency's outreach efforts as well as accessibility to the public. Through these Regional Offices and videoconferencing sites, SCAG is able to engage an extensive group of stakeholders in its planning and programming processes by facilitating meetings, workshops, and other events and enhances the level of convenience for

members, stakeholders and others interested in learning more about regional planning. SCAG will continue to advance its public participation and consultation efforts through the use of its Regional Offices.

C. Native American Tribal Governments Consultation

There are 16 federally recognized Native American Tribal Governments in the SCAG region. SCAG's Bylaws provide Tribal Governments a formal voice in the regional planning process, including voting representation on the Regional Council and policy committees. In response to state and federal consultation requirements, as well as public participation needs and environmental justice concerns, SCAG is continuing to develop processes to ensure that Tribal Governments' concerns are reflected in the regional transportation planning and programming processes, including developing documented procedures for consultation with Indian Tribal Governments and Federal Land Management Agencies.

SCAG will continue to reach out to Tribal Governments to provide updates and obtain input on the development of the 2020 RTP/SCS. SCAG will also formally conduct tribal consultation for the 2020 RTP/SCS PEIR, pursuant to AB 52.

VI. SCAG Organizational Structure and Decision Making Steps

General Assembly (GA) – SCAG is governed by official representatives from every member city, county and County Transportation Commission (CTC) through the General Assembly which annually brings together SCAG's membership and helps set the course for the coming year. The GA is a forum where policy matters can be identified and addressed. The GA also adopts the General Fund budget for the next fiscal year, ratifies SCAG officer positions, and considers approval of any proposed changes to the SCAG Bylaws as well as any proposed resolutions for adoption by the GA.

Regional Council (RC) – The primary decision-making occurs through SCAG's Regional Council, a governing body comprised of elected officials representing six (6) counties and 191 cities in the SCAG region. The SCAG Bylaws provide for Regional Council representation from each of the CTCs, the recognized tribal governments, air quality agencies and the Transportation Corridor Agencies. In September 2014, the Regional Council also approved the addition of a public transportation representative to serve on the body to represent the transit interests of all the operators in the SCAG region. SCAG's policy-making process is guided by the work of SCAG's three major Policy Committees: the Transportation Committee; the Community, Economic and Human Development Committee; and the Energy and Environment Committee. Members of the Regional Council serve on one of the three Policy Committees for two-year terms.

The following summarizes the roles of the Policy Committees as well as other committees with SCAG:

Transportation Committee (TC) – The TC examines regional policies, programs and other matters pertaining to mobility and accessibility, roads and highways, transit, airports and seaports, system preservation and management, goods movement, transportation finance and other aspects of Southern California's transportation system.

Community, Economic and Human Development Committee (CEHD) – The CEHD oversees the agency's efforts to develop regional policies for housing, economic development, land use, growth forecasting, sustainability and other community development needs.

Energy and Environment Committee (EEC) – The EEC considers environmental and energy-related issues of regional significance, including air and water quality, solid and hazardous waste, habitat preservation, environmental justice, greenhouse gas reduction and matters pertaining to the California Environmental Quality Act.

Legislative, Communications and Membership Committee (LCMC) – The LCMC is responsible for developing recommendations to the Regional Council regarding legislative, communications and membership matters; providing policy direction for the agency's marketing communications strategy, outreach issues/materials and electronic communications systems; reviewing sponsorship opportunities for the agency whose cost will exceed \$5,000; and promoting agency membership. The duties of the LCMC may also include such other duties as the Regional Council may delegate.

Executive/Administration Committee (EAC) – SCAG's core leadership team is represented by the Executive/Administration Committee, which includes the RC Officers (President, First Vice President, Second Vice President and Immediate Past President), Policy Committee Chairs and Vice Chairs, the representative from the Tribal Government Planning Board serving on the Regional Council, an additional four (4) Regional Council members appointed by the SCAG President, and one (1) member from the private sector to serve on the EAC in an ex-officio, non-voting capacity. In addition to their critical position in guiding SCAG's regional decision-making process, EAC members play an elevated role as SCAG representatives throughout the region as well as at the state and federal levels. The EAC also addresses matters regarding human resources, finance, operations, communications and any other matters referred by the RC.

Policy Task Forces/Subcommittees – In addition to the Policy Committees, the RC has established a number of task forces, subcommittees and peer groups to provide for focused attention to specific policy or planning issues. Currently, the following groups meet as needed:

- Audit Committee
- Bylaws & Resolutions Committee
- Nominating Committee
- Transportation Conformity Working Group
- Technical Working Group

Subregions – A total of 15 subregions represent portions of the SCAG region with shared interests, issues and geography. Subregions play an important role as a conduit between SCAG and the cities and counties of the region by participating and providing input on SCAG's planning activities. This involvement helps the Regional Council and its various committees make better informed decisions.

The 15 subregions in the six (6) counties that make up the SCAG region are listed below.

Imperial County

• Imperial County Transportation Commission (ICTC)

Los Angeles County

- Arroyo Verdugo Cities
- City of Los Angeles
- Gateway Cities Council of Governments (GCCOG)
- Las Virgenes Malibu Council of Governments
- North Los Angeles County
- San Gabriel Valley Council of Governments (SGVCOG)
- San Fernando Valley Council of Governments (SFVCOG)
- South Bay Cities Council of Governments (SBCCOG)
- Westside Cities Council of Governments (WCCOG)

Orange County

• Orange County Council of Governments (OCCOG)

Riverside County

- Coachella Valley Association of Governments (CVAG)
- Western Riverside Council of Governments (WRCOG)

San Bernardino County

 San Bernardino County Transportation Authority (SBCTA)/San Bernardino Council of Governments

Ventura County

• Ventura Council of Governments (VCOG)

VII. MAP-21 Implementation: Transition to Performance-based Planning and Programming

MAP-21 calls for the establishment, monitoring and management of performance measures and standards relating to Safety, Pavement and Bridge Conditions, Performance of the National Highway System, Freight Movement on the Interstate System, and Congestion Mitigation and Air Quality Improvement (CMAQ). To comply with these federal requirements, SCAG will work with Caltrans and local stakeholders to establish regional targets of these respective areas and a path towards achieving and monitoring them. More specifically, SCAG will work with the state and locals to establish two- and four-year performance targets for each of the aforementioned issue areas by October 2018 (with the exception of safety, which adheres to a different federal schedule). SCAG will work with relevant stakeholders to establish safety targets through winter 2018. Though MPO targets are due February 2019, significant stakeholder and policymaker discussions will occur during the fall and winter of 2018. SCAG anticipates providing regular updates to stakeholders on its progress towards achieving these targets, including in the Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) and the Federal Transportation Improvement Program (FTIP). Furthermore, SCAG will allocate appropriate resources, starting with the FY 2018-19 OWP, and account for the activities associated with addressing these new requirements. Table 2 on the next page shows SCAG's efforts on performance measures in the FY 2018-19 OWP.

Table 2: Performance Measures Efforts in FY 2018-19

Performance Measure (PM)	OWP Project	OWP No.	Project Objective	Relevant Task/Steps to support MAP-21 PM	Proj	ject Budget
PM1	Transportation Safety and Security	010.0170.08	Integrate safety and security into the 2020 RTP/SCS to improve the safety and security of the transportation system for all transportation system users. Evaluate existing safety and security conditions and policies. Guide development of regional safety and security targets, policies, and strategies for the 2020 RTP/SCS. Per MAP-21 requirements, establish calendar year 2019 regional safety targets, in coordination with Caltrans.	Step 1: Integrate safety and security into transportation planning by coordinating with other agencies and jurisdictions to evaluate and develop regional transportation safety and security targets and policies	\$	173,938
PM1	Region-Wide Data Coordination	055.0704.02	Develop, maintain and enhance data and information to support planning and decision making in a timely and effective manner. To provide quality data analysis, reports, and information to support decision makers and promote economic development. In addition, these data sets play a significant role in producing empirical results and analyses for the RTP/SCS development and research.	Step 1: Collect data and information to support SCAG planning activities.	\$	1,232,399
PM2	System Management and Preservation	010.2106.02	The objective of this project is to address the region's preservation needs and identify strategies for the upcoming 2020 RTP/SCS.	Step 2: Develop final existing conditions report for pavement and bridge conditions; Step 3: Develop targets for pavement and bridge conditions in coordination with the Caltrans; Step 4:: Continue to collect updated pavement and bridge conditions and system data; Step 5: Develop final existing conditions report for system management performance measures; Step 6: Develop targets for system management in coordination with the Caltrans.	\$	85,391
РМ2	RTP Financial Planning	015.0159.01	Updates to 2016 RTP financial plan as required and development of 2020 RTP financial plan and supporting elements. Facilitate work on efforts to evaluate alternative funding mechanisms for transportation. Work with stakeholders on federal surface transportation re-authorization efforts related to technical input and analyses associated with transportation finance component.	Step 2: Monitor state and federal budgets as well as reauthorization efforts to assess implications on the RTP financial plan. *Evaluates impact of investments (e.g., SB1) on ability to achieve targets specific to bridges and pavement condition.	\$	492,249
РМЗ	Goods Movement Planning	130.0162.18	Facilitate implementation of goods movement recommendations in 2016 RTP and Comprehensive Regional Goods Movement Plan and Implementation Strategy. Begin development of 2020 RTP goods movement elements. Work with stakeholders on federal surface transportation re-authorization effort related to technical input and analyses associated with goods movement.	Step 2: Monitor state and federal legislation, regulations, and guidance to assess implications on RTP goods movement planning. *This task will support freight related MAP-21 Target setting and reporting requirements.	\$	1,058,877
РМЗ	RTP/SCS Performance Monitoring	150.4095.01	Manage SCAG's overall MAP-21 performance monitoring, data collection, and reporting program. Coordinate with Caltrans and local stakeholders on the development of statewide and regional MAP-21 performance monitoring targets. Compile data resources for MAP-21 travel time reliability, peak hour excessive delay, and CMAQ measures. Manage preparation of baseline MAP-21 performance monitoring 'Existing Conditions' report for the SCAG region for travel time reliability, peak hour excessive delay, and CMAQ measures. Develop a comprehensive on-going regional performance monitoring program in support of implementation of the 2016 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS). Refinement of regional performance monitoring tools to support 2020 RTP/SCS development. Participate in 2020 RTP/SCS development activities, including identification of Plan goals, objectives, and performance	Step 2: Develop 'Existing Conditions' report for MAP-21 travel time reliability, peak hour excessive delay, and CMAQ performance measures; Step 3: Coordinate with Caltrans and local stakeholders on the development of regional targets for MAP-21 travel time reliability, peak hour excessive delay, and CMAQ performance measures; Step 6: Manage SCAG's overall MAP-21 performance monitoring, data collection, and reporting program; Step 7: Coordinate the HPMS data collection effort from local jurisdictions through distribution of data files, providing guidance and technical assistance as needed; Task 10: Manage SCAG's overall MAP-21 performance monitoring program	\$	403,567
ТАМ	Transit Planning	140.0121.01	Support regional transit operators in the planning process pursuant to the FTA's Metropolitan Transportation Planning requirements and the SCAG MOU with transit operators. Monitor FTA rule-making related to new provisions in MAP-21 and coordinate with transit operators to address new requirements regarding transit asset management and transit safety as they relate to metropolitan transportation planning. Provide technical memoranda and support to the Regional Transit Technical Advisory Committee. Assess and evaluate transit service to promote cost effectiveness. Provide support and analysis for regional High- Speed Rail (HSR) planning efforts and for the LOSSAN corridor planning efforts. Provide environmental document review and analysis. Participate in regional, state and federal transit studies and forums. Incorporate new performance measures into existing conditions analyses as mandated in MAP-21.	Step3: Address new federal requirements for transit planning under MAP-21, including transit asset management and transit safety, as they relate to metropolitan transportation planning.	\$	653,180
ТАМ	Transit Asset Management Planning	140.0121.08	In coordination with transit operators and county transportation commissions, develop regional transit asset management inventory, performance measures and targets in support of the RTP/SCS update, and to fulfill federal mandates for state of good	Step 1: Develop regional TAM inventory and database. Consultant; Step 2: Forecast regional TAM needs and develop cost estimates; Step 3: Facilitate development of regional TAM targets.	\$	341,538
			repair/transit asset management.			4,441,139

PAST ACCOMPLISHMENTS

In FY 2017-18, SCAG completed and secured approval for 2016 RTP/SCS Amendment #2. SCAG also initiated 2016 RTP/SCS Amendment #3 during this fiscal year.

OBJECTIVE

Transportation System Planning involves long-term planning for system preservation, system maintenance, optimization of system utilization, and strategic system expansion of all modes of transportation for people and goods in the six-county region, including Imperial, Los Angeles, Orange, Riverside, San Bernardino, and Ventura. The Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) is the primary vehicle SCAG uses to achieve our transportation system planning goals and objectives. As the MPO for this region, one of SCAG's major responsibilities is to develop, administer, and update the RTP/SCS. The primary objective of this work element is to ensure SCAG is fulfilling its roles and responsibilities in this area as the designated MPO and RTPA for this region. The focus of FY 2018-19 will be to continue to manage, guide, and monitor progress of the 2016 RTP/SCS and develop the 2020 RTP/SCS. SCAG will ensure that the 2020 RTP/SCS Plan is consistent with state and federal requirements while addressing the region's transportation needs.

OBJECTIVES

Ensure that the RTP/SCS is consistent with state and federal requirements while addressing the region's transportation needs through monitoring progress, supporting policies and actions called out in the 2016 RTP/SCS, and identifying adjustments necessary and appropriate for the 2020 RTP/SCS. Coordinate continued development of the 2020 RTP/SCS, including maintaining overall schedule and work plan, ensuring any new state and federal requirements are addressed, and soliciting proposed projects for the plan from county transportation commissions.

PROJECT DESCRIPTION

Ensure that Congestion Management and Transportation Demand Management (TDM) strategies are part of the continuing Transportation Planning Process. Develop and refine measures to monitor and evaluate current and projected congestion. Identify strategies to manage congestion for inclusion in the RTP/SCS update. Continue to monitor and review County Congestion Management Programs for consistency with the RTP/SCS and State and Federal Requirements.

PROJECT PRODUCT(S)

Congestion Management and TDM strategies to be included in the RTP/SCS update.

Carryover 🗹	Ongoing 🛛	PROJECT MANAGER:	STEPHEN FOX				
PREVIOUS ACCOMPLISHMENTS							

In FY 17-18, staff initiated the TDM Strategic Plan to develop regional strategies to reduce vehicle-miles of travel (VMT) and greenhouse gas emissions for inclusion in the RTP/SCS update.

OBJECTIVES

Transportation Demand Management (TDM) is a key strategy for helping the region achieve its mobility, air quality, and sustainability goals. The objective of this task is to develop transportation options to improve mobility in the region by identifying and evaluating strategies that promote alternatives to the single-occupant vehicle (SOV). The TDM Toolbox is a cafeteria of TDM strategies, such as carpooling, vanpooling, parking cash-out, etc., designed to reduce overall vehicle-miles of travel (VMT). The TDM Toolbox can be found in the 2016 RTP/SCS Congestion Management Appendix.

Continued to monitor and review proposed SOV capacity enhancing projects in the FTIP for consistency with federal congestion management process requirements. Continued to monitor/review county Congestion Management Programs for consistency with adopted RTP/SCS and state and federal requirements.

OBJECTIVES

The objective of this task is to ensure congestion management is part of the continuing transportation planning process in accordance with California Government Code 65089 and the US Code of Federal Regulations, 23CFR450.320. Measures to monitor current congestion, evaluate projected congestion, and identify strategies to manage congestion will be incorporated into the RTP/SCS update.

In FY 17-18, the consultant procurement process was initiated to begin the TDM Strategic Plan effort.

OBJECTIVES

The objective of this task is to develop a long-range Transportation Demand Management (TDM) Strategic Plan to provide a framework for an objectives-driven, performance-based planning process that identifies and promotes strategies to increase the efficiency of the transportation system through alternative modes of travel. The Strategic Plan will help guide long-range TDM initiatives, define specific management strategies for the region's most congested corridors, and develop TDM-specific performance measures to assist with evaluating system-wide and project-level performance.

PAST ACCOMPLISHMENTS

In FY 2017-2018, SCAG completed an amendment to the 2016 RTP/SCS to enable critical transportation investments throughout the region to move forward in a timely manner. SCAG also continued efforts to further key mobility innovation and incentive initiatives included in the 2016 RTP/SCS, including updating the regional concept of operations for a regional express lane network.

OBJECTIVE

This work program is critical to addressing some of SCAG's core activities-specifically, satisfying federal planning requirements on financial constraint; ensuring a reasonably available revenue forecast through the RTP planning horizon, and addressing system level operation and maintenance cost analyses along with capital cost evaluation of transportation investments. In FY 2018-19, this work program will involve development of the 2020 RTP financial plan.

PAST ACCOMPLISHMENTS

In FY 2017-18, SCAG completed and secured approval for Addendum #2 for the 2017 RTP/SCS PEIR for 2016 RTP/SCS Amendment #2.

OBJECTIVE

Prepare environmental documentation to ensure regulatory compliance with applicable federal and state laws. Review environmental plans, programs and projects of regional significance. Monitor changes in environmental compliance requirements. Integrate the most recent environmental policies into planning programs such as environmental justice. Enhance the intergovernmental review database to support planning programs such as performance monitoring. The focus of FY 2018-19 will be to continue to monitor progress of the 2016 RTP/SCS and provide additional environmental documentation for additional amendments, as needed. Staff will initiate and develop the 2020 RTP/SCS Programmatic Environmental Impact Report (PEIR), pursuant to the California Environmental Quality Act (CEQA).

PAST ACCOMPLISHMENTS

In FY 2017-2018, SCAG adopted and received federal approval of conformity determinations for 2016 RTP/SCS Amendment #2 and four 2017 FTIP Amendments. Staff prepared draft conformity analysis for 2019 FTIP and 2016 RTP/SCS Consistency Amendment #3. SCAG adopted one formal TCM substitution. Staff collaborated with ARB & air districts in evaluating and establishing two sets of new transportation conformity budgets in Imperial County's 2018 PM10 Plan and 2012 Annual PM2.5 Standard Plan. Staff reviewed, approved, and uploaded to federal CMAQ tracking system annual CMAQ project obligation reports from six CTCs. Staff facilitated interagency consultation on regional and project-level transportation conformity through TCWG.

OBJECTIVE

Perform regional transportation conformity and GHG emission analyses. Ensure that the RTP/SCS, FTIP and their amendments meet federal transportation conformity requirements and state SB 375 regional GHG emission reduction targets. Oversee and/or provide support for SCAG air quality planning, analysis, documentation and policy implementation. This includes collaboration with the California Air Resources Board (ARB) and local air districts in the SCAG region in developing air quality management plans/state implementation plans (AQMPs/SIPs), including new transportation conformity emission budgets to meet federal transportation conformity requirements. Facilitate federally required interagency consultation via SCAG's Transportation Conformity Working Group (TCWG), including the

WORK ELEMENT: 025 - AIR QUALITY AND CONFORMITY

processing and acting as clearinghouse for the particulate matter (PM) hot spot analysis for transportation projects within the region. Continue the process to ensure the timely implementation of transportation control measures (TCMs). Continue to track and participate in relevant air quality rulemaking. Collaborate with six County Transportation Commissions (CTCs) in the SCAG region to compile, review, and upload federally required information for projects funded by the Congestion Mitigation and Air Quality Improvement Program (CMAQ).

PROJECT DESCRIPTION

Oversee and provide support for regional transportation conformity determination and related air quality planning, analysis, documentation and policy implementation in SCAG region. This includes collaboration with California Air Resources Board and local air districts in SCAG region in developing air quality management plans/state implementation plans including new emissions budgets to meet federal transportation conformity requirements. Facilitate federally required inter-agency consultation via SCAG's Transportation Conformity Working Group, including processing, and acting as Clearinghouse for particulate matter (PM) hot spot analyses for transportation projects within SCAG region. Ensure timely implementation of transportation control measures (TCMs). Track and participate in relevant air quality rule-making. Fulfill federally required annual CMAQ reporting requirements.

PROJECT PRODUCT(S)

1. Conformity Analysis/Determinations/Reports as needed for RTP/FTIP and amendments.

2. Air Quality Analysis as needed, such as for: RTP/SCS scenarios, PEIR, and TCM substitution.

3. CMAQ reporting documentation.

4. Transportation Conformity Working Group meeting documentation. Including maintaining on-line Particulate Matter (PM) Hot Spot review/determination Clearinghouse.

TASK: 19-0)25.0 ⁻	164.01			TASK BUDGET:	\$762,445
TASK NAME:	All	R QUALITY	PLANN	ING AND CONFORMITY		
Carryover		Ongoing	V	PROJECT MANAGER:	RONGSHENG LUO	

WORK ELEMENT: 025 - AIR QUALITY AND CONFORMITY

PREVIOUS ACCOMPLISHMENTS

1. Held 11 TCWG meetings to conduct Clean Air Act required interagency consultation on critical issues related to both regional (RTP and FTIP) and project-level conformity; Processed PM hot spot interagency review forms or analyses in a timely manner to move forward important transportation projects towards implementation.

2. Prepared and secured RC adoption & federal approval of conformity determinations for 2016 RTP/SCS Amendment #2

3. Prepared and received Federal approval of conformity analyses for 2017 FTIP Amendments

4. Prepared draft conformity analysis for 2019 FTIP and 2016 RTP/SCS Consistency Amendment #3

5. Collaborated with ARB & air districts for evaluating and establishing two sets of new PM2.5 and PM10 conformity budgets in Imperial County 2018 PM10 Plan and 2012 Annual PM2.5 Plan.

6. Prepared OCTA's SR-241/91 Connector TCM substitution; Reviewed and processed on-going TCM delay requests from Metro, VCTC, RCTC, and SBCTA.

7. Prepared and/or presented staff reports to EEC/RC as well items for the monthly ED Reports on important air quality & conformity issues/topics

8. Prepared monthly RC ARB Update talking points and monthly MSRC TAC meeting summaries

9. Participated in monthly meetings of SCAQMD HRAG and MSRC TAC as SCAG representative

10. Participated in monthly meetings of MSRC and SCAQMD Mobile Source Committee to keep track and monitor critical air quality & conformity regulations, plans, programs, policies, and issues.

11. Attended SCAQMD's Facility-based Measures and Incentive Funding Working Groups meetings to be actively engaged in the implementation of 2016 South Coast AQMP.

12. Compiled, analyzed, & uploaded annual SCAG-region CMAQ report from six CTCs.

- 13. Reviewed applications received under MSRC TCM RFP/Solicitation Categories
- 14. Prepared two chapters of Final 2019 FTIP Guidelines.

15. Facilitated SCAG's successful application for a grant of \$2 million from MSRC to implement SCAG's Future Communities Initiative.

OBJECTIVES

Conduct regional transportation conformity analysis and related air quality planning, analysis, documentation and policy implementation to help improve air quality throughout SCAG region and ensure RTP/SCS, FTIP and their amendments comply with federal transportation conformity regulations and any other applicable federal and state requirements.

Facilitate inter-agency consultation and staff the Transportation Conformity Working Group including processing and acting as clearinghouse for particulate matter hot spot analyses for transportation projects within SCAG region.

Update and ensure timely implementation of transportation control measures.

Track and report on relevant air quality rule makings, policies and issues.

Fulfill federally required annual Congestion Mitigation and Air Quality (CMAQ) Program reporting requirements.

PAST ACCOMPLISHMENTS

During FY 2017-2018, the 2017 FTIP was updated with six amendments, six Administrative Modifications and 1 RTP/FTIP consistency amendment. SCAG, by working closely with the federal and state funding agencies and its regional partners, successfully received approval for these FTIP Amendments and Administrative Modifications. Also, the SCAG Regional Council approved the 2019 FTIP Guidelines at their September 2017 meeting. Approval of these guidelines marked the start of the 2019 FTIP development cycle.

OBJECTIVE

The Federal Transportation Improvement Program (FTIP) is a multimodal list of capital improvement projects programmed over a six-year period. The FTIP is the program that implements the RTP. The currently approved FTIP is the 2017 FTIP and was federally approved and found to conform on December 16, 2016. The program contains approximately \$27.7 billion worth of projects in FY2016-2017 – 2021-2022. The FTIP must include all federally funded transportation projects in the region, as well as all regionally significant transportation projects and projects for which approval from a federal agency is required regardless of funding source. The FTIP is developed to incrementally implement the programs and projects in the Regional Transportation Plan. The FTIP is amended on an on-going basis, as necessary, thereby allowing projects consistent with the Regional Transportation Plan to move forward toward implementation. Staff expects Federal Agencies' approval of the 2019 FTIP in December 2018, at which time

WORK ELEMENT: 030 - FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM

the 2017 FTIP will expire.

PROJECT DESCRIPTION

The Federal Transportation Improvement Program (FTIP) is a multimodal list of capital improvement projects programmed over a six-year period. The 2017 FTIP is the current federally approved FTIP and was found to conform on December 16, 2016. The program contains approximately \$27.7 billion worth of projects in FY 2016/2017 - 2021/2022. Staff expects December 2018 approval of the 2019 FTIP by the federal agencies and for the 2017 FTIP to expire at that time.

The FTIP must include all federally funded transportation projects in the region, as well as all regionally significant transportation projects for which approval from federal agencies is required regardless of the funding source. The FTIP is developed to incrementally implement the programs and projects in the Regional Transportation Plan.

The FTIP is amended on an on-going basis—as necessary. Thereby allowing projects consistent with the Regional Transportation Plan to move forward toward implementation.

PROJECT PRODUCT(S)

The Federal	Transpo	ortation Impro	ovement	Program (FTIP) is amended	on an on-going basis as nec	essary to allow

The Federal Transportation Improvement Program (FTIP) is amended on an on-going basis as necessary to allow projects to move forward toward implementation. During FY 2017/18, the 2017 FTIP was updated with 4 Amendments, 5 Administrative Modifications and 1 RTP/FTIP consistency amendment. SCAG, working closely with

WORK ELEMENT: 030 - FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM

the federal and state funding agencies and its regional partners, successfully received approval for these FTIP Amendments and Administrative Modifications.

During FY 2017/18, the SCAG Regional Council approved the 2019 FTIP Guidelines at their September 2017 meeting; this marked the start of the 2019 FTIP development cycle. Analysis of the 2019 FTIP commenced and the draft document was prepared.

The FTIP Database continues to be upgraded to address the region's needs in development of the county and regional TIP and associated amendments.

OBJECTIVES

To keep funds flowing in the SCAG Region so that projects may be implemented consistent with SCAG's approved 2016-2040 Regional Transportation Plan/Sustainable Communities Strategy (2016-2040 RTP/SCS).

PAST ACCOMPLISHMENTS

In FY 2017-2018, SCAG continued to work with local jurisdictions and partner agencies in the SCAG region by implementing its GIS Services Program, which provides technical assistance to local jurisdictions in the development of their GIS and data capabilities. A specific component of the GIS Services Program was the undertaking of introductory, intermediate and advanced GIS software training workshops for participating local jurisdictions, as well as providing GIS services for additional cities, as well as the provision of intern staffing support to improve local technical know-how. SCAG also continued to implement an Enterprise GIS system to further integrate all aspects of regional planning as well as acquire, develop and process regional data as part of fulfilling our strategic goal of being a central source of data/information about the Southern California, in addition to fulfilling socioeconomic data requests from member agencies, universities, other public agencies and the general public in support of their planning/information needs. Finally, SCAG created several interactive GIS web tools to help decision makers and everyday residents access GIS data in their communities.

OBJECTIVE

To support SCAG's ongoing role as a Regional Information Center and manager for all data and information related to Southern California and to provide data support and mapping capabilities to better serve the needs of the agency and our partner agencies. This program will also provide data and information to stakeholders to promote economic

WORK ELEMENT: 045 - GEOGRAPHIC INFORMATION SYSTEM (GIS)

development and enhance the effectiveness of decision-makers. Additional goals include discovering and developing cutting edge web-GIS applications and tools for data sharing; providing advanced spatial analytics and visualization for insights of data and information; providing an interconnected platform for integrated planning and regional collaboration.

A top priority will be to provide GIS training, data cleanup/updating/sharing/standardizing and other GIS services to our local jurisdictions. Work will continue on the implementation of an Enterprise GIS system (including GIS hardware/software, GIS database, GIS analysis, and GIS applications) that will serve as the guide for meeting Objective #4 of the SCAG Strategic Plan. The program will play an integral part in the development of the Federal Transportation Improvement Program, amendments to the current RTP/SCS, and development of the 2020 RTP/SCS and other planning activities.

PROJECT DESCRIPTION

Provide overall service and support for SCAG's GIS needs. Upgrade the existing GIS system by enhancing applications that promote data sharing and maintenance. Collect new GIS data from local jurisdictions, the state, and Federal Government. Develop GIS applications that accommodate the needs of: GIS and data for SCAG, subregions, and member jurisdictions.

PROJECT PRODUCT(S)

SCAG Project Maps, GIS data-set update, web-based map applications.

TASK: **19-045.0694.01**

TASK NAME: GIS DEVELOPMENT AND APPLICATIONS

TASK BUDGET: \$86,176

WORK ELEMENT: 045 - GEOGRAPHIC INFORMATION SYSTEM (GIS)

Ongoing **KIMBERLY CLARK** Carryover $\mathbf{\nabla}$ **PROJECT MANAGER:** $\mathbf{\nabla}$

PREVIOUS ACCOMPLISHMENTS

This project supports the in-house development of interactive information resources for use by stakeholders. Specific accomplishments include technical support to applicants in the SCAG region for the Affordable Housing and Sustainable Communities (AHSC) state-wide grant program, SCAG's inaugural Story Maps Challenge, mapping Metro's Transit Supportive Planning Toolkit, and economic development information tools for decision makers (EIFD/CRIA Technical Assistance Application), among other projects.

OBJECTIVES

Create mapping and data oriented web applications that allow stakeholders and local jurisdictions to view and update SCAG's technical databases in accordance with the agency's long term policy priorities. Specific web tools include those that allow local jurisdictions to view their local data, including socioeconomic data, land use information, building permits, demolition permits, business establishments and jobs, etc.

STEPS AND PRODUCTS

Step No	Step Description	Work Type	Р	т	0	Start Date	End Date
1	Develop interactive maps and data tools for SCAG Projects	Staff				07/01/2018	06/30/2019
2	Maintain and update existing tools	Staff				07/01/2018	06/30/2019
3	Connect web-based GIS applications with decision makers and stakeholders	Staff				07/01/2018	06/30/2019
4	Provide GIS training to SCAG staff, member jurisdictions	Staff		Ø		07/01/2018	06/30/2019

TASK: 19-045.0694.03

TASK BUDGET: \$358,088

TASK NAME: PROFESSIONAL GIS SERVICES PROGRAM SUPPORT

Carryover Ø Ongoing Ø PROJECT MANAGER: JAVIER AGUILAR

PREVIOUS ACCOMPLISHMENTS

In the last fiscal year, we completed GIS rollout of 20 local jurisdictions in where they received software, hardware, data, and training. We also trained nearly 100 participants. Finally, we successfully implement the SCAG Intern Assistant Program. This program assigned 9 nine interns to work at cities on various GIS and planning projects. This year, we continue the SCAG Intern Program, as well as provide support to cities that expressed interest for assistance in the Local Input process.

OBJECTIVES

Provide professional GIS support to SCAG member jurisdictions. Specific assistance will be provided to jurisdictions with few or no GIS resources.

WORK ELEMENT: 045 - GEOGRAPHIC INFORMATION SYSTEM (GIS)

PAST ACCOMPLISHMENTS

- Development of the Augmented 2017 Regional Active Transportation Program and approval of the Cycle 4 Regional ATP Guidelines

- Selection and administration of the Sustainability Planning Grants to support local agencies in implementing the active transportation elements of the RTP/SCS.

- Preparation of existing conditions analysis and outlook for the 2020 RTP/SCS.

OBJECTIVE

Staff will continue work on the development of the active transportation and public health components of the 2020 RTP/SCS, as well as, play a significant role in the stakeholder engagement and outreach process to ensure the plan resonates and empowers countywide and local agencies to advance policies and projects that align with regional planning goals.

For FY 2018-19, staff will also continue to focus on activities that support the delivery of more active transportation projects in the region, including the selection of projects to be included in the 2019 Regional ATP, administration of projects included in the Cycle 2 and 3 of the regional component of the Statewide Active Transportation Program, building support for local projects through the implementation Go Human demonstration projects, and providing technical assistance directly to cities through grants awarded through SCAG's Sustainability Program. Staff will also

WORK ELEMENT: 050 - ACTIVE TRANSPORTATION PLANNING

work with Caltrans, counties and individual cities to help fund and advance multi-jurisdictional active transportation projects that are part of the RTP/SCS.

Staff will continue to lead the implementation of a Regional Active Transportation Safety and Encouragement Campaign with resources awarded from the Office of Traffic Safety and the Mobile Source Air Pollution Reduction Review Committee (MSRC). The Campaign will be implemented in partnership with the six county health departments and six county transportation commissions and aims to increase levels of active transportation while reducing collisions. Staff will continue participation with Caltrans Strategic Highway Safety Plan Challenge Area development and monitoring as it relates to active transportation and provide technical support to the transportation department on safety performance measures.

Efforts will also be continued to expand regional capability to measure the impact of active transportation investments, including through better data collection, modeling and co-benefit analysis (focusing on greenhouse gas emissions, public health and the economy).

This program also supports planning and analysis in other key policy areas including water, public health and energy, as related to the development and implementation of the RTP/SCS. Planning around public health will be expanded through expanded outreach to local partners and by providing resources and tools to local agencies.

PREVIOUS ACCOMPLISHMENTS

Prepared outlook and work plan for the development of the 2020 Plan. Prepared existing conditions analysis. Administered and provided project management support for local active transportation plans and Go Human pilot projects.

OBJECTIVES

Continue collaboration with counties and cities to implement active transportation initiatives including planning, analysis and pilot projects. These efforts support counties and cities in better understanding and communicating benefits of active transportation projects in order to more strategically invest resources and attract greater investment, including from statewide sources (ATP/Cap & Trade) and existing discretionary and new local sources (LA City Street Bond, Metro Measure M). Increased investment in active transportation is critical to implementing RTP/SCS and demonstrating progress. Begin development of 2020 RTP/SCS Active Transportation Element.

PAST ACCOMPLISHMENTS

SCAG continued building on state-of-the-art forecasting methodology and data/statistics support such that regional growth estimates and forecasts are technically sound and meet the Best Practices of MPOs general forecasting practices. SCAG also continued to work with a panel of experts and other stakeholders to develop the most advanced methodology and reasonable assumptions to develop estimates and forecasts at the regional and county level. Work under this program incorporated the new information from the American Community Survey into the growth forecast process; responded to the legal requirement of SB 375; provided advanced research and technical support for special projects on regional growth forecasts and estimates. SCAG also strengthened its relationships with Southern California's universities and colleges, along with international research and planning partners, to expand the knowledge base and enhance the quality of long range planning activities. SCAG hosted the annual SCAG/USC Demographic Workshop and supported a SCAG Planning Studio class at Cal Poly Pomona . SCAG's delegation of elected officials and planning staff were invited to China, South Korea, and Japan to share and learn best planning practices in the areas of big data and analytics, demographics, resilience, emergency responses, and earthquake preparation and planning.

\$424,606

WORK ELEMENT: 055 - REGIONAL FORECASTING AND POLICY ANALYSIS

OBJECTIVE

The key focus of this work element is to develop regional and county-level population, household and employment estimates and projections, which will be used for implementing and monitoring the 2016 Regional Transportation Plan and Sustainable Communities Strategy (RTP/SCS), and developing the 2020 RTP/SCS. Essential to the program is the development of state-of-the-art growth forecasting methodologies and technical tools, which have set the standard for regional growth forecasting. This program also addresses the following: show growth forecasts in terms of population, employment, households and how underlying growth assumptions and scenarios are related to congestion and transportation investment. Additional program objectives include the collection, processing and analysis of data used in support of the planning activities of the agency.

WORK ELEMENT: 055 - REGIONAL FORECASTING AND POLICY ANALYSIS

PROJECT DESCRIPTION

To provide data and information to better serve the needs of the agency with respect to Regional Transportation Planning. To collect, develop, and analyze data and information that supports the planning activities of the agency including (but not limited to): the Regional Transportation Plan, Integrated Growth Forecast, Integrated Transportation and Land Use Model, Regional Housing Needs Assessment, and other planning activities. To coordinate data sharing among SCAG and other stakeholders.

PROJECT PRODUCT(S)

Numerous data-sets—including (but not limited to): Regional Employment, Building Permits, Median Home Prices, Retail Sales Data, and Population and Household Information.

TASK: TASK BUDGET: \$1,232,399 19-055.0704.02 **REGION-WIDE DATA COORDINATION** TASK NAME: TOM VO Carryover \checkmark Ongoing **PROJECT MANAGER:** $\mathbf{\nabla}$ PREVIOUS ACCOMPLISHMENTS In FY 18, this project supported the planning and development of socio-economic data and transportation related data for the 2020 RTP/SCS by purchasing and collecting data. The following shows the accomplishment for FY17: - Renewal subscription for Citilabs Cube Land licenses - Purchased several transportation-related data (Streetlight, commodity flow), environment-related data (endangered species) and socioeconomic data (property transaction data) - Subscribed to participate in the household survey data collection

- Subscribed to the Journal of the American Planning Association (JAPA), real estate research council, California Planning and Development Report, the Transportation Monitor Report

- Subscribed to Center of Demographic Research (CDR)

OBJECTIVES

Develop, maintain and enhance data and information to support planning and decision making in a timely and effective manner. To provide quality data analysis, reports, and information to support decision makers and promote economic development. In addition, these data sets play a significant role in producing empirical results and analyses for the RTP/SCS development and research.

PROJECT DESCRIPTION

Examination of regional and county-level economic factors—including, but not limited to, the socioeconomic, housing and demographic trends, workforce development, international trade, emerging innovations and technology advancement, regulatory environment, pending and current legislation, and enhanced infrastructure financing districts (EIFDs) and other sources of funding for infrastructure development—and how these factors, along with SCAG's planning activities—including, but not limited to, the Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) and the Federal Transportation Improvement Plan (FTIP)—have an impact on the economic and job growth prospects for the individual county-level and regional economies.

PROJECT PRODUCT(S)

Update to the Southern California Economic Growth Strategy, which may include, but may not necessarily be limited to, the following: 1) Development of policy recommendations and regulatory approaches that could reduce the cost and delivery time of major infrastructure projects; 2) Examination of how enhanced infrastructure financing districts (EIFDs) and other innovative funding tools can contribute to the development and implementation of infrastructure projects; and 3) Investigation of housing and workforce as foundations for economic development and job creation.

TASK: 19-0	55.1531.01	TASK BUDGET:	\$168,899
TASK NAME:	SOUTHERN CALIFORNIA ECONOMIC GROWTH S	TRATEGY	

Carryover I Ongoing PROJECT MANAGER: HOUSTON LANEY

PREVIOUS ACCOMPLISHMENTS

Held successful Southern California Economic Summit in December 2017, which focused this year on the housing needs of the six-county SCAG region. County economic reports were provided by economic consultants that provided an economic overview of each county, as well as information regarding growth areas, areas of concern, and outlooks on housing.

OBJECTIVES

Through the agency's analyses, SCAG has produced information quantifying the economic benefits of reducing congestion. The objective of the Southern California Economic Growth Strategy is to continue this analysis to provide information to support regional decision making and long-range transportation and land use planning, as well as a common set of short and long-term priorities and recommendations for the region to help businesses, public agencies, and communities improve their economic viability.

PAST ACCOMPLISHMENTS

In FY 2017-18, SCAG continued to partake in various corridor planning studies providing input and feedback as related to the 2016 RTP/SCS. SCAG also initiated the I-105 Corridor Sustainability Study during this fiscal year.

OBJECTIVE

Provide input to the Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) on the design concept and scope of major transportation corridor investments, as identified upon the completion of corridor planning studies conducted under this work element and in partnership with other agencies. Ensure that corridor planning studies are completed in accordance with federal transportation planning requirements as identified in 23 CFR 450.

PAST ACCOMPLISHMENTS

Numerous projects were awarded in early 2017 on behalf of cities to support a variety of planning projects in three categories: Active Transportation, Integrated Land Use/Transportation, and Green Region. These planning projects are in various stages of deployment to directly benefit member jurisdictions.

A series of workshops were conducted to advise stakeholders of GGRF program opportunities, and to build capacity for specific projects in the Affordable Housing Sustainable Communities (AHSC) program. Technical programmatic and application assistance was provided to stakeholders seeking grant/loan resources from AHSC.

Joint Work Programs have moved forward with the partnership of CTCs to integrate transportation and sustainability planning. One example is advancing Regional Conservation Investment Strategies (RCIS) with the San Bernardino County Transportation Authority.

Sustainability Awards continue to recognize regionwide efforts to reduce GHG and promote integrated plan use and transportation planning. A revamped program with a series of new categories was identified.

Successful partnership with the Local Government Commission on the Civic Sparks Program has continued. The Green Region Initiative has continued to progress with new measures of performance added to local policy framework evaluation.

WORK ELEMENT: 065 - SUSTAINABILITY PROGRAM

OBJECTIVE

SCAG's Sustainability Program is a core effort for implementing the 2016 Regional Transportation Plan and Sustainable Communities Strategy (RTP/SCS). The program demonstrates that the region can achieve both mobility and air quality goals through local land use and policy changes along with targeted transportation investments. Overall objectives of the Sustainability Program are met through the following projects:

Sustainability Grant Program: Collaborative assistance to member local governments and communities for coordinating sustainable transportation, land use and regional policies and issues in local planning. Emphases will include local and regional planning for greenhouse gas reductions, locally-applied "Green Region Initiative" strategies, public health impacts related to transportation activities, and assistance in General Plan updates.

Greenhouse Gas Reduction Fund (GGRF) Technical Assistance: Help ensure state greenhouse gas reduction fund monies are available to Southern California region jurisdictions and stakeholders, particularly disadvantaged communities, and that funded projects support goals of the 2016 RTP/SCS, mitigate climate change, and advance state and federal transportation planning priorities.

Local Technical Assistance: Facilitation of the Toolbox Tuesdays Training Series to build local capacity in innovative and integrated transportation and planning tools.

SCAG Sustainability Awards: Awards Program for outstanding examples of integrated transportation and land use planning, implementing the 2016 RTP/SCS at the local level.

CTC Joint Work Programs: Policy coordination among SCAG and CTCs for various sustainability issues related to implementation of the RTP/SCS and CTC Joint Work Programs, such as First mile/Last mile, complete streets, climate action plans, adaptation, and active transportation.

Civic Sparks Program: Serve as Regional Coordinator for Civic Sparks Program and host program fellows.

PROJECT: SUSTAINABILITY PROGRAM

Carryover $\mathbf{\nabla}$ Ongoing $\mathbf{\nabla}$ PROJECT MANAGER: **INDIA BROOKOVER**

PREVIOUS ACCOMPLISHMENTS

Developed at least 6 Toolbox Tuesday webinars and in person events in 2017-2018. Planning for events in 2018-2019 begins 7/1/2018.

OBJECTIVES

Provide Local Technical Assistance and the Toolbox Tuesdays Training Series to build local capacity in innovative and integrated transportation and planning tools. The Toolbox Tuesdays serve as important opportunities for inter-governmental communication. By bringing together planners from diverse areas of the region the sessions provide opportunities for jurisdictions to learn from each other about successes and failures in new approaches to transportation and planning. In a region as vast as SCAG, forums where staff from dense urban communities can share their concerns and successes with planners from less populated areas are highly valued. Toolbox Tuesdays sessions equip local government planners to think beyond their traditional roles, and respond to new mandates that require collaboration and public participation.

PROJECT DESCRIPTION

This effort will develop land use and urban growth components of the 2016 RTP/SCS and assist SCAG in bringing the critical issues facing the region into focus with quantified outcomes. Products of this effort will highlight policy issues and choices regarding Southern California's growth patterns, taking into account both land use and transportation component.

This work will require close involvement with SCAG staff, and with other consultant teams engaged with SCAG, on the development of SCS scenarios.

PROJECT PRODUCT(S)

The outcome of this effort will be to assist in creating a clear and cohesive dialogue and series of decisions on how the region can successfully implement SB 375, achieve greenhouse gas reduction targets by the California Air Resources Board (ARB), expand economic growth in the region, and improve livability and sustainability.

 TASK BUDGET: \$84,706

 TASK NAME:
 2050 GHG PATHWAYS REGIONAL STUDY

 Carryover
 ☑
 Ongoing
 □
 PROJECT MANAGER:
 GRIEG ASHER

 PREVIOUS ACCOMPLISHMENTS

ARBs recently approved Scoping Plan (AB32 & SB32) employs a statewide GHG reduction model (2050 GHG Pathways) and SCAG has downscaled the statewide model to the regional level by employing SCAG specific inputs

WORK ELEMENT: 065 - SUSTAINABILITY PROGRAM

and generating regional outputs for use in the 2020 RTP/SCS.

OBJECTIVES

The California Air Resources Board (CARB) has a statewide analysis model (Pathways) for evaluating various greenhouse gas (GHG) reduction strategies for achieving the Governor's Executive Orders to reduce 80% of statewide GHG by 2050. SCAG has refined the Pathway model analysis to develop specific and regional based solutions, strategies and potential paths to State's 2050 GHG goals and other critical interim targets prior to preparation of the 2020 RTP/SCS. SCAG will expand the Pathway's analysis to develop regional inputs, regional outputs and regional strategies for use in the 2020 RTP/SCS, specifically to help ensure transportation investments and land use strategies help the SCAG region achieve an 80% reduction 2050 GHG goalsand other critical interim targets. In addition to developing strategies for SCAG's 2020 plan, this effort will help support ARB's Scoping Plan and Caltrans 2040 Plan and associated GHG reduction goals.

PAST ACCOMPLISHMENTS

In FY 2017-18, staff completed transportation and air quality modeling for the third amendment for the 2016 RTP/SCS. Staff continued to update and enhance several models for the analysis of 2020 RTP/SCS and other planning activities, including travel demand model, heavy-duty truck model, sub-regional model, and scenario planning model. In addition, staff completed traffic data collection and analysis for the base year model validation. Staff developed the draft 2020 RTP/SCS growth forecast for 197 jurisdictions including population, household, and employment. Further, staff continued to analyze data and comments received from local jurisdictions. Staff closely collaborated with LA city, LA county, and San Bernardino County Transportation Authority (SBCTA) to develop customized growth projections to better reflect growth visions and support planning activities. Staff continued data analyzing and developing efforts for scenario planning and transportation modeling exercises. To support data needs for planning analysis and research activities, staff fulfilled about two hundred modeling and socioeconomic data requests from SCAG members and other stakeholders. Staff coordinated and held four Modeling Task Force meetings; and engaged in other outreach activities to promote inter-agency collaboration and consultation. Staff coordinated modeling activities with transportation commissions, Caltrans, ARB, air districts, and State/Federal agencies; and provided technical assistance and modeling services to regional and sub-regional agencies in support of their model development and planning studies.

WORK ELEMENT: 070 - MODELING

OBJECTIVE

Provide data and modeling services for the development and implementation of the RTP/SCS, FTIP, and other major land use and transportation planning initiatives. Analyze socioeconomic data and build analytical foundations for planning activities. Develop demographic and employment growth forecast through collaborating with local jurisdictions and peer planning agencies and building consensus. Continue to provide small area socioeconomic data for scenario planning and transportation modeling. Provide member agencies tools to analyze the impacts of their land use and planning decisions. Develop, maintain and improve SCAG's modeling tools to more effectively forecast travel demand and estimate resulting air quality. Maintain a leadership role in the Southern California modeling community by coordinating the Region's modeling activities and by providing technical assistance and data services to member agencies and other public institutions. Promote model consistency through an active subregional modeling program. Continue ongoing modeling collaboration with SCAG's partners to advance the region's modeling practices.

PROJECT DESCRIPTION

Continually enhance and maintain regional models for use in evaluating SCAG's plans and programs. Incorporate state of the art model components, update model inputs and parameters, and perform model testing to ensure models accurately replicate existing and future conditions.

PROJECT PRODUCT(S)

Enhanced modeling procedures, updated model assumptions/parameters, and up-to-date model inputs.

TASK: 19-070.0130.10 TASK BUDGET: \$1,019,361									
TASK NAME	E: N	ODEL ENH	ANCE	MENT AND MAINTENANCE					
Carryover	V	Ongoing	V	PROJECT MANAGER:	HSI-HWA HU				

PREVIOUS ACCOMPLISHMENTS

1) Completed the development of an Imperial county transportation model. The model will be used for the analysis of transportation projects for Imperial county; 2) Completed data collection and analysis for screenline count traffic survey project. Traffic data of 600 links were collected and analyzed. Screenline count data will be used for year 2016 model validation; 3) Completed activity-based model development. The model will be used for the analysis of 2020 RTP/SCS; and 4) Began to develop a public health analysis tool of Scenario Planning Model. This is a multi-year project that will be completed at FY2018-19. The tool will be used to analyze the impact of public health from different land use scenarios.

OBJECTIVES

To ensure SCAG's models are up-to-date by continuously updating model inputs and parameters. To improve model procedures and incorporate new modeling methodologies to further enhance SCAG's modeling capabilities. These activities may include enhancements and updates to the following SCAG models: Trip-Based Model; Activity-Based Model; sub-regional models; goods movement and warehousing models; pricing models; seaports and airports related trips; visitors and inter-regional travel models; air quality models; Scenario Planning Model; and growth forecasting models.

TASK NAME: ACTIVITY-BASED MODEL (ABM) DEVELOPMENT AND SUPPORT

Carryover

Ongoing
☑

PROJECT MANAGER: HSI-HWA HU

PREVIOUS ACCOMPLISHMENTS

SCAG activity-based model was developed. The model was able to complete model run and generated reasonable results. A test with scenarios of 2016 RTP/SCS was analyzed and proved the model can be used for the 2020 RTP/SCS. A initial model validation and calibration for each submodel was completed. Several important submodels and model components, such as mode choice and destination choice models, were updated and enhanced.

OBJECTIVES

The objective of this project is to continue the update and enhancement of SCAG activity-based model. The model structure, parameters, and software scripts will be further reviewed and analyzed. Model components on planning policy analysis, such as TDM, will be analyzed.

PROJECT DESCRIPTION

Develop tools for the collection of data for Scenario development and the creation of small area growth forecast. Facilitate communication between SCAG and local jurisdictions in the process of local input and public outreach. Provide member agencies with tools to analyze the outreach. Impacts of their land use and planning decisions.

PROJECT PRODUCT(S)

Scenario Planning Model: Socioeconomic growth forecast at various geographical levels.

TASK: 19 TASK NAME			LANN	ING AND MODELING	TASK BUDGET:	\$743,563	
Carryover	V	Ongoing	Ø	PROJECT MANAGER:	JUNGA UHM		
PREVIOUS ACCOMPLISHMENTS							

Staff prepared SPM Data Management system with updated datasets for the 2020 RTP/SCS local input and successfully released the system to all 197 local jurisdictions in the region. Also continued maintenance and monitoring of the system and provided technical support and trainings to local jurisdictions.

OBJECTIVES

Continued maintenance and monitoring of Scenario Planning Model (SPM) systems with the provision of training and technical assistance, outreach and educational programs to assist local planners and SCAG staff, especially in the development and analysis of the 2020 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS). Also assess and update the existing SPM scenario system including its analysis modules to better support scenario development and analysis activities for the 2020 RTP/SCS.

PAST ACCOMPLISHMENTS

Continued development of a comprehensive regional performance monitoring program, including the establishment of regional performance measures, setting of performance targets, and acquisition of data in support of on-going monitoring of the implementation of the 2016 RTP/SCS. Collaboration with FHWA and Caltrans on development of statewide and regional MAP-21/FAST Act performance monitoring program, including regional performance measure target-setting in support of federal performance-based planning and reporting requirements. Coordination with Caltrans and local agencies in the annual data collection process in support of the Highway Performance Monitoring System (HPMS).

OBJECTIVE

Provide performance assessment and monitoring of the SCAG region (particularly the implementation of the 2016 RTP/SCS) including growth and development, transportation system performance, environmental quality, regional sustainability and climate resilience, and the socioeconomic well-being of the SCAG population (e.g., income and housing affordability). The results of the monitoring and assessment program provide the basis for informed policy-making and support plan implementation, particularly in relation to regional transportation planning. This program also works with the California Department of Transportation in the coordination and data collection mandated under the Highway Performance Monitoring System (HPMS).

TASK NAME: PUBLIC INFORMATION AND COMMUNICATION

Carryover I Ongoing I PROJECT MANAGER: JEFF LIU

PREVIOUS ACCOMPLISHMENTS

Completed Year in Review and Sustainability Awards videos; Recorded, streamed and provided archive videos of its monthly Regional Council meetings on website; Produced and distributed the monthly Spotlight and SCAG Update electronic newsletters; Assisted with communications for Go Human advertising campaign and demonstration events; Developed program and event materials for Regional Conference; and created Annual Accomplishments report.

WORK ELEMENT: 090 - PUBLIC INFORMATION & COMMUNICATION

OBJECTIVES

Develop and implement external communications strategies to promote partnerships, build consensus, and foster inclusiveness in the decision-making process. SCAG's communications strategies facilitates the agency's transportation planning activities by helping to inform the general public, media, agency stakeholders and partners about the existence, purpose and potential impact of these activities and to convey this information in ways that are engaging and easy to understand for general audiences. Materials developed for this purpose include website content, videos, news releases, fact sheets, signage, posters, and other publications. Related activities include developing materials for public outreach meetings and workshops and programming content for special events.

PAST ACCOMPLISHMENTS

Completed the 2018 Public Participation Plan that will guide public outreach and engagement for SCAG's programs and plans. In addition, SCAG completed an update to its Title VI Program, along with SCAG's Language Assistance Program for Limited English Proficient Populations. With the development of its Language Assistance Program, SCAG is working toward improving its strategies to engage and seek input from traditionally underserved populations by providing translations of key materials into Spanish, Chinese, Korean and Vietnamese, the four most spoken languages in the region's households other than English.

OBJECTIVE

Engage regional stakeholders in the SCAG planning and programming process through the support and enhancement of outreach efforts to local governments, Tribal Governments, and members of the various stakeholder entities, including community, environmental, business, and academic groups, as well as other interested parties. The SCAG Regional Offices are critical components in these efforts, with SCAG staff assigned to an office in each county in the SCAG region.

PREVIOUS ACCOMPLISHMENTS

SCAG and the Dr. Lucy Jones Center worked with more than 35 cities, organized into subregional cohorts, to help them define their own priorities in addressing seismic resilience and provide technical assistance in helping them achieve their goals. This includes updating their Hazard Mitigation Plan, inventory of vulnerable buildings, critical infrastructure, cell phone communications and building code strengthening ordinances, as well as provide Dr. Lucy Jones' expertise at city council meetings to provide context and gain council support for resilience planning. A phone conference was held monthly for each cohort group in addition to individual monthly check-ins with the cities.

OBJECTIVES

Provide technical assistance, resources and strategies to prepare for and mitigate the transportation impacts of region-wide emergencies, including earthquakes and other natural disasters.

PAST ACCOMPLISHMENTS

In FY 2017-2018, SCAG completed its first comprehensive update of the Regional ITS Architecture since 2011. SCAG's multi-county Regional ITS Architecture focuses on elements that cross county boundaries, including good movement, traveler information, commuter rail, safety, and active transportation.

OBJECTIVE

Continue engaging with regional stakeholders on ITS and ITS related matters, including use and maintenance of the updated Regional ITS Architecture. Maintain the web-accessible Architecture and provide documentation to maximize usability of the Architecture and ensure on-going maintenance. Seek to provide training and educational opportunities to stakeholders on ITS related topics in partnership with FHWA/Caltrans as opportunities become available.

PREVIOUS ACCOMPLISHMENTS

In FY18, the multi-county Regional ITS Architecture was updated, incorporating the latest National ITS Architecture and Connected Vehicle Reference Implementation Architecture.

OBJECTIVES

The objective of this multi-year task is to develop a Regional ITS Strategic Plan and Regional ITS Architecture update in coordination with Caltrans, county transportation commissions, and other agency stakeholders. The Strategic Plan will identify and assess emerging ITS and technologies and potential impacts to the regional transportation system, identify institutional and technological systems and processes needed to address the issues and support successful implementation, and provide a framework for updating the Regional ITS Architecture.

PAST ACCOMPLISHMENTS

In FY 2017-18, SCAG continued ongoing analyses for the East-West Freight Corridor, completed analyses of urban delivery constraints in key regional locations, and developed an integrated passenger and freight rail forecast to understand physical and operational constraints, use agreements, and planned capacity improvements for regional rail facilities for the 2020 RTP/SCS. SCAG also collaborated closely with regional stakeholders to provide input into state and federal grant processes including coordination of regional efforts to pursue competitive federal and state discretionary grant funding opportunities.

OBJECTIVE

This work program focuses on integrating freight related transportation initiatives into the regional transportation planning process, including efforts to refine and support the implementation of the Comprehensive Regional Goods Movement Plan and Implementation Strategy. This strategy includes proposals set forth in the 2016 RTP/SCS.

PROJECT DESCRIPTION

SCAG's Good Movement Program works to integrate the movement of freight into the regional transportation planning process. SCAG focuses on continuing efforts to refine and support the implementation of a comprehensive regional goods movement plan and strategy. This strategy intends to enhance performance of goods movement proposals set forth in the 2016 RTP through the application of new technologies, development of regional rail strategies, identification of environmental mitigation strategies, considerations between land use and freight movement, and establishment of potential mechanisms for improved regional mobility.

PROJECT PRODUCT(S)

Various technical memoranda, issues papers, and/or reports associated with preparation of the goods movement component of the RTP.

Convened several meetings with regional stakeholders. Continued to develop strategies to advance project objective.

OBJECTIVES

To fulfill the obligations of MOU signed by regional, state, and federal agencies to advance Southern California's role as a national leader and support the identified regional goods movement system.

PAST ACCOMPLISHMENTS

In FY 2017-2018, SCAG began discussions with the transit operators regarding TAM target setting, and updated the MOUs with its transit operators and county transportation commissions (CTCs) to incorporate new federal rulemaking and requirements for performance-based planning. SCAG, together with the University of California, Los Angeles (UCLA) Institute of Transportation Studies, released a report entitled "Falling Transit Ridership," which sought to identify the causes of ridership declines in the region. SCAG also concluded work on a study to improve transit and rail connectivity between Los Angeles and San Bernardino Counties.

OBJECTIVE

Support and engage transit and rail operations in corridor and regional planning efforts and in further refining the transit and rail strategies for inclusion in the 2020 RTP/SCS. Monitor FTA rulemaking related to new provisions in the Moving Ahead for Progress in the 21st Century Act (MAP-21) and coordinate with transit operators to address new requirements related to transit safety and transit asset management (TAM), as they relate to metropolitan transportation planning. Assess and monitor regional transit system performance. Work with transit operators through the Regional Transit Technical Advisory Committee to ensure stakeholder input and participation in the metropolitan transportation planning process, consistent with the SCAG MOUs with the transit operators.

PROJECT DESCRIPTION

Conduct planning to support the development of the transit and rail element of the Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS).

Support regional transit operators in the planning process pursuant to the FTA's Metropolitan Transportation Planning Requirements a the SCAG MOU with transit operators. Address new Map-21 requirements as they relate to transit safety and asset management/state of good repair.

Provide support and analysis for the region's passenger rail planning efforts, including participation in the LOSSAN Board and TAC, the Metrolink Board and TAC, CA High Speed Rail and other related planning activities.

PROJECT PRODUCT(S)

1. Regional Transit TAC meetings, with agendas, minutes, and staff reports.

 $\mathbf{\nabla}$

2. Technical reports, memoranda, and presentation materials documenting transit and rail planning activities conducted as part of the metropolitan transportation planning process.

3. Manage and conduct consultant supported studies.

Ongoing

TASK: **19-140.0121.01**

TASK	BUDGET:	\$653,180

TASK NAME: TRANSIT PLANNING

Carryover

PROJECT MANAGER: MATTHEW GLEASON

PREVIOUS ACCOMPLISHMENTS

In FY18, staff continued to support and integrate regional transit operators in the metropolitan transportation planning process, primarily through the Regional Transit Technical Advisory Committee. Activities included monitoring and implementing FTA rule-making regarding performance-based planning and particularly state of good repair/transit asset management; assessing causes of transit ridership decline in the region; participating in regional, state, and federal transit studies and forums; researching pilot programs to incorporate new technology and mobility innovations into the delivery of transit services; and monitoring and reporting on regional transit system performance.

WORK ELEMENT: 140 - TRANSIT AND RAIL

OBJECTIVES

Support regional transit operators in the planning process pursuant to the FTA's Metropolitan Transportation Planning requirements and the SCAG MOU with transit operators. Monitor FTA rule-making related to new provisions in the Moving Ahead for Progress in the 21st Century Act (MAP-21) and coordinate with transit operators to address new requirements regarding transit asset management and transit safety as they relate to metropolitan transportation planning. Provide technical memoranda and support to the Regional Transit Technical Advisory Committee . Assess and evaluate transit service to promote cost effectiveness. Provide support and analysis for regional High-Speed Rail (HSR) planning efforts and for the LOSSAN corridor planning efforts. Provide environmental document review and analysis. Participate in regional, state and federal transit studies and forums. Incorporate new performance measures into existing conditions analyses as mandated in MAP-21.

PROJECT MANAGER: STEPHEN FOX

PREVIOUS ACCOMPLISHMENTS

In FY18, staff continued to participate in and support regional and statewide passenger rail planning efforts, including participation in the LOSSAN JPA, Metrolink Board and TAC, CA High Speed Rail and other related passenger rail planning activities.

OBJECTIVES

Guide implementation of the Southern California High-Speed Rail MOU between the California High-Speed Rail Authority and SCAG, CTCs, and Metrolink for the programming of \$1 billion in High-Speed Rail (HSR) funds to the region's existing passenger rail services.

WORK ELEMENT: 140 - TRANSIT AND RAIL

Provide support and analysis for the region's HSR planning efforts, including participation in the LOSSAN Board and TAC, the Metrolink Board and TAC, the Southern California Rail Partners Group, the Southern California Inland Corridor Group and various stakeholder and community meetings.

In FY 18, the consultant and project team performed and completed the phase two alternatives analysis for the study's six build alternatives, including costing and ridership forecasting technical memoranda, a facility and capacity analysis, and a cost/benefit analysis. Also, several meetings were held with the study's two stakeholder committees.

OBJECTIVES

This multi-year study will assess east-west travel needs between LA and San Bernardino Counties, and identify a coordinated transit and rail strategy that considers the Metro Gold Line, the Metrolink San Bernardino Line, Express Bus services on the 1-10 carpool/express lanes, and Bus Rapid Transit on local streets.

PAST ACCOMPLISHMENTS

Under this project, SCAG crafted and began the Bottom-Up Local Input and Envisioning Process for the 2020 RTP/SCS and RHNA, which will involve extensive consultation with local jurisdictions and stakeholders to get feedback on existing conditions and opportunities for sustainable growth. This process began in June 2017 and will continue through SCAG's adoption of the RHNA.

Under this element, SCAG also initiated a new program aimed at increasing the adoption of new technology and the accessibility of data and analytics to our partner agencies and the general public. The Future Communities Initiative (FCI) is a three year program that will provide guidance, support data coordination and standardization, expand partnerships, and provide resources to local jurisdictions throughout Southern California. This program will specifically result in studies and strategies for local cities that outline the steps needed to become smart communities, develop a process for identifying data sets that could benefit from regional standardization and create processes for coordinating data collection, explore opportunities for engagement with supportive initiatives and build partnerships that magnify impact, and pursue resources for planning and implementation of open data, big data, and new technology initiatives.

WORK ELEMENT: 150 - COLLABORATIVE PROJECTS

OBJECTIVE

Collaborative Projects fosters project-based cooperation across the five departments under the Land Use & Environmental Planning Division, with the goal of streamlining resources to provide enhanced services to jurisdictions and regional stakeholders. Projects included here involve substantial outreach with local staff (cities, counties, CTCs, and state/federal partners), aim to implement the 2016-2040 Regional Transportation Plan and Sustainable Communities Strategy (2016 RTP/SCS), and to initiate the planning process for the 2020 RTP/SCS. Planning efforts are focused by topic: Partnership for Sustainability, Cap and Trade, Comprehensive Monitoring, and Scenario Planning & Local Input: Pathways to the 2020 RTP/SCS.

-Hosted water forum expanding list of stakeholder interested in development of 2020 RTP/SCS. -Facilitated multi-sectoral committee on open data and big data, resulting in recommendations for SCAG's role in advancing use of technology and enhanced data analytics in local and regional planning. Resulted in new work

WORK ELEMENT: 150 - COLLABORATIVE PROJECTS

element: Future Communities Program.

OBJECTIVES

Bring new voices to the table and promote cross-sectoral engagement on key planning/policy issues. Advance planning practices to reflect changing nature of society as a result of demographic and technological changes. Test new methods of engagement and dialogue to find solutions to challenging policy/planning issues. Attract new partners and resources to promote RTP/SCS implementation.

Amendment 1 of the FY19 OWP is reprogramming consultant budget for partnerships with other governmental entities, public universities, institutes of higher education, and non-profit organizations. These contracts would meet the requirements outlined in the State Contracting Manual, Section 3.06 Contracts with Other Governmental Entities and Public Universities, and Section 3.15 Contracts with Non-Profit Organizations. Additionally, institutes of higher education would meet the definition in 20 U.S.C. 1001, Chapter 28.

TASK BUDGET: \$307,913

TASK NAME: HQTA/SUSTAINABLE COMMUNITIES INITIATIVE

Carryover ☑ Ongoing □ PROJECT MANAGER: GRIEG ASHER

PREVIOUS ACCOMPLISHMENTS

The HQTA Pilot program selected 5 pilot projects/cities to receive advanced planning development for HQTA projects in the SCAG region. These pilot projects are templates for helping implement HQTA projects throughout the region going forward.

OBJECTIVES

The SCAG region, home to about 18.3 million people in 2012, currently features 5.9 million households and 7.4 million jobs. By 2040, the 2016 RTP/SCS projects that these figures will increase by 3.8 million people, with nearly 1.5 million more homes and 2.4 million more jobs. The 2016 RTP/SCS projects and anticipates an overall land use pattern that reinforces the trend of focusing new housing and employment in the region's High Quality Transit Areas (HQTAs). Consensus will need to be reached to ensure these patterns can be achieved, will reinforce VMT and GHG reductions, and will support transit oriented development. A pilot project approach will be developed to identify and analyze issues that relate to integration of regional transportation and community goals and objectives in land use to better determine context-sensitive approaches for supporting growth in HQTAs in a variety of regional settings.

High-Quality Transit Areas (HQTAs) are generally walkable transit villages or corridors, consistent with the 2016

WORK ELEMENT: 150 - COLLABORATIVE PROJECTS

RTP/SCS and are within one half-mile of a well-serviced transit stop or a transit corridor with 15-minute or less service frequency during peak commute hours.

An HQTA is based on the language in SB 375 which defines:

• Major Transit Stop - A site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods (CA Public Resource Code Section 21064.3).

• HQTC High-Quality Transit Corridor – A corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.

WORK ELEMENT: 150 - COLLABORATIVE PROJECTS

PREVIOUS ACCOMPLISHMENTS

Initiated development of goals, objectives, and performance measures in support of the 2020 RTP/SCS. Attended multiple workshops and webinars on MAP-21 performance-based planning requirements. Coordinated the extraction and refinement of NPMRDS data in support of MAP-21 performance measures related to National Highway System (NHS) travel time reliability and peak hour excessive delay. Organized the compilation of criteria pollutant emission reduction data and non-single occupant vehicle mode share data in support of MAP-21 CMAQ reporting requirements. Coordinated effort to obtain NHS infrastructure data for MAP-21 pavement/bridge condition reporting requirements. Worked closely with Caltrans, other state MPOs, and local stakeholders in the development of statewide MAP-21 performance targets. Initiated analysis of statewide performance targets established for travel time reliability and peak hour excessive delay to inform SCAG's option to either accept all or any of the statewide targets , or to develop an alternative set of targets specifically for the SCAG region.

OBJECTIVES

Manage SCAG's overall MAP-21 performance monitoring, data collection, and reporting program. Coordinate with Caltrans and local stakeholders on the development of statewide and regional MAP-21 performance monitoring targets. Compile data resources for MAP-21 travel time reliability, peak hour excessive delay, and CMAQ measures. Manage preparation of baseline MAP-21 performance monitoring 'Existing Conditions' report for the SCAG region for travel time reliability, peak hour excessive delay, and CMAQ measures. Develop a comprehensive on-going regional performance monitoring program in support of implementation of the 2016 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS). Refinement of regional performance monitoring tools to support 2020 RTP/SCS development. Participate in 2020 RTP/SCS development activities, including identification of Plan goals, objectives, and performance measures.

PROJECT DESCRIPTION

Implement the SCAG Sustainability Planning Grant program to support and implement the policies of the 2016 RTP/SCS.

PROJECT PRODUCT(S)

Project materials for Sustainability Planning Grant projects. Updated program websites, presentation and other documentation of outreach activities.

TASK: 19	-150.4	4590.01			TASK BUDGET:	\$1,902,319		
TASK NAME: INTEGRATED SUSTAINABILITY PROGRAM (2016 PHASE 1)								
Carryover	V	Ongoing	V	PROJECT MANAGER:	MARCO ANDERSON			

WORK ELEMENT: 150 - COLLABORATIVE PROJECTS

PREVIOUS ACCOMPLISHMENTS

SCAG administered a call for projects in late 2016. In FY18 SCAG worked with applicants to formalize the scopes of work and release Requests for Proposals. Work underway on several sustainability planning grant projects with local jurisdictions.

OBJECTIVES

Primary objective is collaborative assistance to member local governments and communities for coordinating sustainable transportation, land use and regional policies and issues in local planning. The task will implement the SCAG Sustainability Planning Grant program to support and implement the policies of the 2016 RTP/SCS. Work will also be consistent with Caltrans' Smart Mobility Framework and Complete Streets program (Deputy Directive 64-R1) and FHWA Planning Emphasis Areas (PEAs.) Emphases will include local and regional planning for greenhouse gas reductions, locally-applied "Green Region Initiative" strategies, public health impacts related to transportation activities and assistance in General Plan updates. Local-regional partnerships that integrate land use planning and transportation investment decision-making are critical to improving mobility, accessibility and air-quality in Southern California. Sustainability Planning Grant projects focused on key opportunity sites as identified in the RTP/SCS, will provide assistance to local jurisdictions for comprehensive planning solutions such as context-sensitive design, multi-modal transportation planning, infill and transit-oriented development projects community outreach and consensus building, fiscal and economic impact analysis, green house gas (GHG) reduction standards, innovative financing and public private partnerships.

Amendment 1 of the FY19 OWP is reprogramming consultant budget for partnerships with other governmental entities, public universities, institutes of higher education, and non-profit organizations. These contracts would meet the requirements outlined in the State Contracting Manual, Section 3.06 Contracts with Other Governmental Entities and Public Universities, and Section 3.15 Contracts with Non-Profit Organizations. Additionally, institutes of higher education would meet the definition in 20 U.S.C. 1001, Chapter 28.

STEPS AND PRODUCTS

step No	Step Description	Work Type	P	Т	0	Start Date	End Date
1	Conduct outreach and develop partnerships for Sustainability Planning Grant projects and other technical assistance.	Staff				07/01/2018	06/30/2019
2	Complete local Sustainability Planning Grant projects that showcase the local and regional benefits of sustainable planning and support the 2016 RTP/SCS and other regional policies.	Staff/Consultant		Ø		07/01/2018	06/30/2019

PROJECT DESCRIPTION

Help make the heavily traveled roadway segment a safe corridor for bicyclists and pedestrians as well as cars trucks, and transit vehicles. The project also includes a living streets manual for context planning purposes. The objective is to promote Active Transportation Plans as well as: improve the Regional Transportation System, reduce GHG, comply with SB 375, and implement SCAG's 2016 RTP/SCS.

PROJECT PRODUCT(S)

Customize Living Streets Design manual.

TASK: 19-145.3480.01		TASK BUDGET:	\$140,428					
	BOULEVARD MULTIMODAL COR							
Carryover 🗹 Ongoing	PROJECT MANAGER	: STEPHEN PATCHAN

PAST ACCOMPLISHMENTS

- Completed Go Human events and demonstration projects in seven communities.

- Completed 14 Bicycle Rodeos and safety programming sessions held in conjunction with Go Human events

-Through Go Human Awareness Campaign, achieved an additional 125 million estimated impressions through billboards, transit stations, digital, social media and radio ads, to add to the more than ½ billion impressions already achieved.

- Developed Seven partnerships with police departments across the region to distribute Go Human campaign materials.

- Completed placement of public health fellows with local jurisdictions to integrate health into transportation planning activities.

- Developed draft Public Health Framework for the 2020 Regional Transportation Plan and Sustainable Communities Strategy.

OBJECTIVE

To fund and participate in environmental and transportation specialized projects with funding from discretionary grants and/or local funds contributed by local jurisdictions. Grants assist the region and local agencies to better integrate land use, technology and transportation planning to develop alternatives for addressing growth, sustainability and to

WORK ELEMENT: 225 - SPECIAL GRANT PROJECTS

assess efficient infrastructure investments that meet community needs. In addition, these discretionary grants provide funding to develop active transportation plans, complete streets plans and safe routes to school plans for local agencies. These grants also fund safety and encouragement campaigns in our region to increase public awareness and support for active transportation through regional partnerships between transportation agencies, health departments, local agencies, non-profits and private sector partners.

WORK ELEMENT: 225 - SPECIAL GRANT PROJECTS

PROJECT DESCRIPTION

As part of the continuing 2016 RTP consultation, this task developed stronger linkages between transportation, Land Use, Sustainability and Public Health through collaborative meetings or workshops. There is an abundance of literature linking Public Health to surface transportation in terms of Air Quality, and levels of physical activity and safety. However, the Public Health community has been traditionally underrepresented in the Transportation Planning Process. This task intends to bring the Public Health perspective into the Transportation Planning Process to improve the overall decision-making process.

PROJECT PRODUCT(S)

Public Health performance information.

TASK: 19 TASK NAME		LTH		TASK BUDGET:	\$253,546
Carryover	Ongoing	V	PROJECT MANAGER:	RYE BAERG	

PREVIOUS ACCOMPLISHMENTS

Conducted fellowship program. Provided data and support for the regional safety campaign. Coordinated with the state department of public health and local partners including all SCAG region health departments. Conducted additional research on the effects of affordable housing, climate change and health equity to inform 2020 RTP/SCS. Conducted Public Health Working Group meetings to gather stakeholder input on the 2020 RTP/SCS. Coordinated statewide review of SCAG's public health model and initiated updates to the model.

OBJECTIVES

Provide leadership and strategic policy formulation for transportation and land use-related public health in the SCAG region. Through the development of appropriate Regional Transportation Plan performance measures for public health. And providing a forum for information sharing and identify best practices employed at the local level. Promote active transportation safety and encouragement among the general population.

Amendment 1 of the FY19 OWP is reprogramming non-labor budget for partnerships with other governmental entities, public universities, institutes of higher education, and non-profit organizations. These contracts would meet the requirements outlined in the State Contracting Manual, Section 3.06 Contracts with Other Governmental Entities and Public Universities, and Section 3.15 Contracts with Non-Profit Organizations. Additionally, institutes of higher education would meet the definition in 20 U.S.C. 1001, Chapter 28.

PROJECT DESCRIPTION

Transportation Pricing Mechanisms. This study entails development of an implementation plan for value pricing. Including: a build-out of the existing and planned managed network of express lanes across Southern California, and integration with one or more pilot projects for Cordon/area pricing within specific major activity centers. Project is a multi-year study.

PROJECT PRODUCT(S)

Products for this project include various reports and technical memorandum defining and assessing pricing alternatives and pilot project options.

***This Project was previously named "Express Travel Choices Phase II".

PAST ACCOMPLISHMENTS

SCAG conducted the annual survey of 2017 Alternative Vehicle purchases and usage by its transit agency members and produced a report. The 2017 AltCar Expo in Santa Monica was sponsored, SCAG moderated a panel on multi-family EV charging station installations. SCAG recognized Foothill Transit with a Clean Cities Award for its transition plan to a 100% electric fleet by 2030. Finally SCAG traveled to Golden, Colorado to attend the Annual Clean Cities Coordinator meeting.

OBJECTIVE

Administer the U.S. Department of Energy (DOE) Clean Cities Program for the SCAG Clean Cities Coalition, including performing outreach and marketing in support of expanding alternative fuels in the SCAG region through on going funds from DOE. Partner with public and private entities to displace petroleum gasoline use by encouraging purchase of alternative vehicles, increasing efficiency of existing fleet vehicles, and reduction of vehicle miles traveled (VMT).

PROJECT DESCRIPTION

Administer The SCAG Clean Cities Coalition Program under a grant from the U.S. Department of Energy (DOE).

PROJECT PRODUCT(S)

Reports, surveys, and documentation required by the Clean Cities Program, including the Annual Coalition Questionnaire, Annual Operating Plan, and the Biannual Coalition Newsletter.

TASK: 19-267.1241.04

TASK BUDGET: \$107,449

TASK NAME: SCAG AND DOE/NETL CLEAN CITIES COALITION COORDINATION

Carryover I Ongoing PROJECT MANAGER: MARCO ANDERSON

PREVIOUS ACCOMPLISHMENTS

In FY 18 SCAG met all of its requirements under the Federal DOE/NETL Grant. SCAG conducted the annual survey of 2017 Alternative Vehicle purchases and usage by its transit agency members. Additionally, staff sponsored the 2017 AltCar Expo in Santa Monica, and moderated a panel on multi-family EV charging station installations. Finally SCAG traveled to Golden Colorado to attend the Annual Clean Cities Coordinator meeting.

OBJECTIVES

Coordinate and promote the efforts of the Department of Energy (DOE) Clean Cities Program and fulfill all DOE Clean Cities Program requirements. Coordinate with regional alternative fuel vehicle promotion stakeholders.

PAST ACCOMPLISHMENTS

SCAG administered a call for projects in late 2016. In FY18 SCAG worked with applicants to formalize the scopes of work and release Requests for Proposals. Work underway on several sustainability planning grant projects with local jurisdictions.

OBJECTIVE

The Sustainability Planning Grant (SPG) Program is a proven, recognized and effective framework for deploying essential planning resources throughout the SCAG region. It will continue to be a critical tool in achieving SB 375 targets and other State goals aimed at reducing GHG emissions. The three main grant categories – Integrated Land Use; Active Transportation; and Green Region Initiative – offer jurisdictions the wherewithal to develop and update local plans that support State priorities, reduce vehicle miles travelled (VMT), and advance the region's Sustainable Communities Strategy (SCS).

PROJECT DESCRIPTION

The Sustainability Planning Grant (SPG) Program encourages and empowers local jurisdictions, CTCs, transit agencies and COGs to plan for sustainable development. Three main categories are (1) Integrated Land Use, (2) Active Transportation, and (3) Green Region Initiative. Each category has specific planning objectives. Overarching goals include integration of land use planning with transportation investments and reduced GHG emissions.

PROJECT PRODUCT(S)

- Updated program website(s), presentations and other documentation of outreach activities.

- Project materials for Sustainability Planning Grant projects.

PAST ACCOMPLISHMENTS

Secured \$2 M grant from the Mobile Source Reduction Committee to implement the Future Communities Pilot Program and initiated first phase of the program which includes exploring promising practices for reducing VMT from local government operations through use of new technologies and enhance data analytics and developing program guidelines.

Hosted Future Communities Forum in concert with SCAG's General Assembly to promote initiative and increase awareness of data tools available or under development to improve regional and local planning through harnessing new technologies and enhanced analytics.

OBJECTIVE

The Future Communities Initiative, guided by of the Open Data/Big Data- Smart and Connected SCAG Region Committee, includes early action items aimed at harnessing the power of new technologies, big data, open data as well as enhanced analytics to promote innovation in regional and local planning and reduce transportation demand. Tools and resources provided through the initiative will enable more informed regional and local policy making, increase the efficiency of public service delivery, and ensure the financial sustainability of future cities. The Future Communities Initiative will play a key role in reducing VMT and GHG emissions by modernizing regional land -use and transportation planning tools and providing local agencies with planning resources to pilot new technologies to reduce

PROJECT DESCRIPTION

The Future Communities Partnership Grant Program is a collaboration between SCAG and the Mobile Source Air Pollution Reduction Review Committee (MSRC) to support city and county agencies in implementing innovative pilot projects that reduce vehicle miles traveled (VMT) from local travel and municipal operations through new technologies and enhanced data analytics. In Phase 1, SCAG will conduct research and analysis to identify new and innovative pilot concepts for reducing VMT, as well as identify more traditional Transportation Demand Management (TDM) strategies that may yield a greater return on investment. The findings from the research will be used to develop program guidelines for a call for projects, which will be issued in FY 2018/2019. In Phase 2, up to \$2 million in MSRC funds will be awarded to implement pilots.

PROJECT DESCRIPTION

To inform the 2020 SCS, SCAG will conduct analyses and engage industry experts and stakeholders to better understand emerging trends and opportunities to reduce commute trips through artificial intelligence, virtualization and other technological, social, or organizational changes that make remote work opportunities at home or at co-working sites more attractive. The study will include a literature review, analysis of regional commute information, focus groups or surveys to better understand the degree to which technology, social, demographic, and organizational change, and policy contribute to employee productivity and the successful adoption of telework and related programs. The findings will inform TDM assumptions and strategies in the 2020 SCS.

None - first project.

OBJECTIVES

To inform the 2020 RTP/SCS, SCAG will conduct analyses to understand emerging social, technological, and organizational trends impacting the workplace which have the potential to alter the time, distance, and location of commute trips in the region. An emphasis will be placed on analyzing the future of several varieties of "working from home." The study will include a literature review, analysis of future home-working by several dimensions, and front-end research on how automation, contract employment, and residential location changes may impact commute patterns. The findings will inform Transportation Demand Management (TDM) assumptions and strategies in the 2020 RTP/SCS.

PROJECT DESCRIPTION

The foundation for a regional clearinghouse of public sector demographic, land-use, transportation, and public opinion data will be established. This will support regional and local planning for implementation of the SCS by (1) enhancing SCAG's existing data system capability to meet local needs for data-driven decision-making, government transparency, collaborative regional and community planning; (2) expanding SCAG's data infrastructure system, enhancing regional data standardization, performing best practices for improvements on data updates; and (3) improving system management, maintenance, and security in order to fully implement and facilitate the region's needs of open data, big data, and new technology utilization for data sharing and data visualization in innovative planning. This will result in an integrated data platform that supports the update of local general plans- including interactive dashboards that help local jurisdictions make decisions according to sustainability metrics included in SCAG's SCS.

PROJECT PRODUCT(S)

- Regional Needs Assessment of Integrated Data Platform, including data standardization needs, implementation steps, timeline and engagement with regional stakeholders.

- Completed upgrade to SCAG's data system architecture, including summary of actions taken.

- Interactive local general plan tool accessible to jurisdictions that serves to implement the SCS - including

dashboards that help local jurisdictions make decisions according to sustainability metrics included in SCAG's SCS.

PREVIOUS ACCOMPLISHMENTS

This is a new task.

OBJECTIVES

This task Includes the development of a Policy Lab, Data Science Fellowship, Future Communities Forum, and the staffing of an Advisory Committee.

Amendment 1 of the FY19 OWP is reprogramming non-labor budget for partnerships with other governmental entities, public universities, institutes of higher education, and non-profit organizations. These contracts would meet the requirements outlined in the State Contracting Manual, Section 3.06 Contracts with Other Governmental Entities and Public Universities, and Section 3.15 Contracts with Non-Profit Organizations. Additionally, institutes of higher education would meet the definition in 20 U.S.C. 1001, Chapter 28.

This task is funded by \$299,690 in FHWA PL Staff, \$38,829 in In-Kind Match to FHWA PL Staff, \$112,825 in FY19 SB1 Formula Staff, \$14,618 in TDA Match to FY19 SB1 Formula Staff, \$44,265 in FY19 SB1 Formula Consultant, and \$5,735 in TDA Match to FY19 SB1 Formula Consultant.

PAST ACCOMPLISHMENTS

This Work Element was added in Amendment 4 of FY18. Projects have not yet started and there are no accomplishments to report.

OBJECTIVE

Provide program administration for SB1 formula funds. Activities will include: conducting the procurement process for work performed by a consultant; preparing and reviewing contract documents; reviewing invoices and preparing requests for reimbursements each quarter; providing progress updates for each awarded grant project each quarter; preparing amendments to the OWP; and collecting and submitting final work products for completed projects.

PROJECT DESCRIPTION

This project will provide program administration of SB1 formula funds. Activities include: conducting the procurement process for work performed by a consultant; preparing and reviewing contract documents; reviewing invoices and preparing requests for reimbursements each quarter; providing progress updates for each awarded grant project each quarter; preparing amendments to the OWP; and collecting and submitting final work products for completed projects.

PROJECT PRODUCT(S)

- Conduct procurement process for work performed by a consultant.
- Prepare and review contract documents.
- Review invoices and prepare requests for reimbursements each quarter.
- Provide progress of each awarded grant project each quarter.
- Prepare amendments to the OWP as required.
- Collect final products/reports for completed grant projects and submit to Caltrans.

PAST ACCOMPLISHMENTS

No progress to report in FY18.

OBJECTIVE

SCAG staff initiated implementation of the 2016 RTP/SCS immediately after its adoption, and has since launched research, planning and studies in preparation for the 2020 SCS. Much of SCAG's research and planning is focused on reducing single occupancy vehicle trips and transportation related GHG through: advancing mode shift; transportation demand management; operational efficiency; system accessibility; and integration of future transportation, employment and land use.

PROJECT DESCRIPTION

This project will support the development of the 2020 SCS by enabling a more robust and stakeholder driven regional scenario development approach. Coordination with existing community based organizations will allow SCAG to engage new audiences with more meaningful engagement during SCS development. The use of a digital platform for a scenario development tool will allow SCAG to reach a broad range of audiences and also capture direct feedback that can be incorporated into SCS scenarios.

PROJECT PRODUCT(S)

- Scenario Workshop Facilitation Guide

- Outreach records as applicable (e.g. Agenda and materials)

- Documentation and Manual for Scenario Development Outreach Tool

The Southern California Association of Governments (SCAG) is the nation's largest metropolitan planning organization and council of governments. To better serve the 18 million residents and 191 cities it represents, SCAG has an office in each of its six member counties: Imperial, Los Angeles, Orange, Riverside, San Bernardino and Ventura. For more information about SCAG call (213) 236-1800 or visit us at www.scag.ca.gov.
