

2012 Regional Transportation Plan Baseline Transportation Projects

A Baseline “no-build” scenario must be established for the purposes of performing the 2012 Regional Transportation Plan’s (RTP) conformity and environmental impact report (EIR) analyses, and in order to develop a performance-based Plan. To this end, SCAG staff has utilized the following criteria from the Transportation Conformity guidelines to identify transportation projects that would comprise the 2012 RTP’s Baseline Transportation Network:

1. All in-place regionally significant highway and transit facilities, services and activities;
2. All ongoing travel demand management or transportation system management activities; and
3. Completion of all regionally significant projects, regardless of funding source, which are currently under construction or are undergoing right-of-way acquisition (except for hardship acquisition and protective buying); come from the first year of the previously conforming transportation plan and/or TIP; or have completed the NEPA process.

Criteria #1 & #2 refer to existing facilities and activities. Criteria #3 refers to future projects, which we have applied to our region’s short-term projects (the adopted 2011 Federal Transportation Improvement Program (FTIP)) in order to develop the attached list of future projects that will comprise the 2012 RTP’s Baseline Transportation Network.
