Hi Ma'Ayn: I hope this email finds you well!

Here is a another perspective on housing numbers by a CM from Albany, California, with supporting links including the state's own LAO, HCD, and DOF materials:

PS: I note wryly that Gov. Newsom wants 1.3 million units from SCAG. It seems [apparently] SoCal is expected to bear the entire brunt of this deficit as the whole state's shortfall is about 1.2 million housing units according to the Embarcadero group-- and California's own verified state data.
