Subject: Would Luke to make a public comment

Would like to make a public comment

My name is Anthony Garcia a Sunline Transit Driver for 26 year I would like to make a comment about a poor management running sunline transit with hydrogen buses that break down on a daily basis and people are being left behind.. the technology is not there yet ... Sunline Transit fueling Station breaks down a daily basis and cannot fuel the buses on a daily basis like they tell the media .. it's a big lie .. please I would like to you all yo know that this is hurting our system and a general manager that is running this company to the ground...when buses are late and we don't take breaks and get spit on and passengers take it out on us please I would like the world to know these buses don't work
